Sad Earth, Sweet Heaven Lucy Rebecca Buck, 1992 **The Stars of Earth - new and selected poems** Emily Grosholz, 2017-10-16 Emily Grosholz weaves elements of philosophy mathematics and the sciences into her experience of the social and natural world to produce wise and cosmopolitan poetry of high lyricism The Stars of Earth starts with new poems chronicling the months of a year lived and observed followed by selections from Grosholz's previous volumes in chronological order This rare treasury spans four decades of Grosholz's acclaimed poetry PRAISE FOR THE STARS OF EARTH Emily Grosholz is a poet of radiant intelligence patient lyricism and meticulous craft She has a gifted naturalist's regard for the living world and wherever she looks that world for its part offers her its poetry With a philosopher's wit and a mathematician's eye for beauty she can link geometry and physics to the apricot color of a robin's breast She also writes with great empathy for her subjects The Stars of Earth collects four decades of her elegant and excellent work We are lucky to have it Mark Jarman author of *The Heronry* Compressed on the page then wafting ever outward on wings of imagination fine poetry and fine theorems are first cousins Or more rarely in poems like Emily Grosholz's twins Timid and fluid rainbows Over the nacreous surfaces Of shells on peacock feathers And soap bubbles appear Whenever incident light Reflects off nether and upper Laminae of films one wave train Tagging after another Like a younger sister Read this book Marjorie Senechal author of *Shaping Space* I admire Emily Grosholz because of the sounds her poems make She is always experimenting even when the results seem effortless The cunning irregularities are what most compel the reader is never allowed to relax The general readers among us are admitted courteously to the civilizing company The heart not as a hackneyed valentine but as a living muscle is always present as pulse and passion The overwhelming sense these poems give is of affirmation Michael Schmidt author of *New and Collected Poems* The Stars of Earth is that rarest of books Emily Grosholz chronicles everything from love to loss childhood to marriage to parenthood She explores two continents and the minds of scientists artists friends long lost family And as befits a poet philosopher whose pursuits include the philosophy of mathematics she achieves potent mixes of the daily and the deep Nietzschean thought served up in a deli a toddler's first steps along the frail parabolas of love Melissa Balmain author of *Walking in on People* [The Complete Writer](#) Mindy Phillips Lawrence, Beverly Walton-Porter, Pat McGrath Avery, Joyce Faulkner, 2005 *The Complete Writer* goes beyond the standard treatise on how to publish and market your work instead it touches on a variety of elements that encompass a writer's personal and professional life From helpful information on how to research and organize your work to tips on developing partnerships and managing the business of writing it covers all the bases **Awakening Earth** Duane Elgin, 1993 Just as there are relatively distinct stages that characterize the development of an individual from infancy to early adulthood so too are there discernible stages in the

development of our species as we move toward a planetary scale civilization Awakening Earth brings together views from science and spirituality East and West the practical and the visionary to present a compelling new picture of human evolution Based upon twenty years of research this book explores the human journey from the initial awakening of hunter gatherers roughly 35 000 years ago through the agrarian era and Industrial Revolution and then goes on to describe three additional stages of development essential for realizing our initial maturity as a global species civilization A disoriented world civilization faced with dwindling resources mounting pollution and exploding population is a recipe for ecological collapse and social anarchy It is imperative that the human family begin to make rapid and profound changes in how we live together on the Earth To accomplish this we must now ask ourselves fundamental questions Who are we What are we doing here Where are we going as a species Awakening Earth provides a catalyst for this conversation with its integrative vision and inspiring map of the journey toward a sustainable compassionate and creative future While not predicting a sudden new age of social enlightenment Awakening Earth does present the promising view that humanity is roughly halfway through seven major transformations in culture and consciousness required to build a planetary civilization that can endure into the deep future

Between Earth and Empire John P. Clark,2019-07-01 *Between Earth and Empire* focuses on the crucial position of humanity at the present moment in Earth history We are now in the midst of the Necrocene an epoch of death and mass extinction Nearing the end of the long history of Empire and domination we are faced with the choice of either continuing the path of social and ecological disintegration or initiating a new era of social and ecological regeneration The book shows that conventional approaches to global crisis on both the right and the left have succumbed to processes of denial and disavowal either rejecting the reality of crisis entirely or substituting ineffectual but comforting

gestures and images for deep systemic social transformation It is argued that a large scale social and ecological regeneration must be rooted in communities of liberation and solidarity fostering personal and group transformation so that a culture of awakening and care can emerge Between Earth and Empire explores examples of significant progress in this direction including the Zapatista movement in Chiapas the Democratic Autonomy Movement in Rojava indigenous movements in defense of the commons the solidarity economy movement and efforts to create liberated base communities and affinity groups within anarchism and other radical social movements In the end the book presents a vision of hope for social and ecological regeneration through the rebirth of a libertarian and communitarian social imaginary and the flourishing of a free cooperative community globally
