Henry Hudson

by Kelly Hulseley

Before planes, people traveled by boat. And getting goods from one place to another took a long time, especially when ships had to sail around continents. In the early 1600s, European trading companies were looking for faster routes to sail to India and Asia.

In 1607, British explorer Henry Hudson led two failed voyages to find a northern passage across the Arctic Ocean to Asia. He was searching for a route above the Arctic Circle, and his biggest problem was navigating around icebergs, which blocked his path. After failing twice, Hudson couldn't get a British company to fund his next voyage. He had to persuade the Dutch-Danish East India Company to back his third expedition.

Hudson left Amsterdam on April 8, 1609 aboard a ship named the *Half Moon*. Once again he was searching for a northern water passage, and just like on his previous trips, icebergs blocked his path and made his crew frustrated. Finally, Hudson also realized that a northern passage across the Arctic would be nearly impossible. He decided to change directions and search for a water route to Asia through the New World instead. Hudson and the *Half Moon*'s crew headed southwest across the Atlantic Ocean to America.

After several months, Hudson landed on small islands near Newfoundland, Canada. He sailed the *Half Moon* along the coast in search of a northwest passage across the continent of North America. He arrived in the New York Harbor and sailed up a body of water that is now named the Hudson River. He thought the river might lead to the Pacific Ocean, but he was wrong, and he was forced to turn back to Europe. He had explored new lands, but did not find a route to Asia.

Hudson made one final attempt in 1610, on a new ship named *Discovery*. He sailed *Discovery* across the northern Atlantic, along the coast of Greenland, and into Canada. He discovered a large
