

Chapter 11 Brake Systems: Diagnosis, Service, and Repair

After studying this chapter, you should be able to:

- Identify common brake components.
- Explain how master and slave cylinders work.
- Explain how air brakes and ABS systems operate.
- Describe how a power-assisted brake system operates.
- Explain the procedure for testing a power-assisted brake system.
- Describe why a vehicle may be slowed when entering a turn.
- Compare brake pads and shoes, and describe their function.

The brake system is the most important safety system on a motor vehicle. The brake system slows the vehicle by applying friction and stops operationally damaged vehicles that are not being repaired.

After working in a shop, you should be able to identify common brake components, explain how a master and slave cylinder works, describe how air brakes and ABS systems operate, describe how a power-assisted brake system operates, and explain the procedure for testing a power-assisted brake system.

Students will receive the most benefit from reading this chapter when they understand the components of a brake system, explain how a master and slave cylinder works, describe how air brakes and ABS systems operate, describe how a power-assisted brake system operates, and explain the procedure for testing a power-assisted brake system.

Brake System Problems Diagnosis

One of the most common brake problems is a vehicle that is slowing down when entering a turn. This is usually a sign of a worn brake system. The most common cause of this problem is worn brake pads and shoes.

When a vehicle slows down when entering a turn, the driver should check the brake system for worn brake pads and shoes.

When a vehicle slows down when entering a turn, the driver should check the brake system for worn brake pads and shoes. The most common cause of this problem is worn brake pads and shoes.
