[The Return of Great Power Rivalry](#) Matthew Kroenig,2020-02-13 The United States of America has been the most powerful country in the world for over seventy years but recently the U S National Security Strategy declared that the return of great power competition with Russia and China is the greatest threat to U S national security Further many analysts predict that America s autocratic rivals will have at least some success in disrupting and in the longer term possibly even displacing U S global leadership Brilliant and engagingly written The Return of Great Power Rivalry argues that this conventional wisdom is wrong Drawing on an extraordinary range of historical evidence and the works of figures like

Herodotus Machiavelli and Montesquieu and combining it with cutting edge social science research Matthew Kroenig advances the riveting argument that democracies tend to excel in great power rivalries He contends that democracies actually have unique economic diplomatic and military advantages in long run geopolitical competitions He considers autocratic advantages as well but shows that these are more than outweighed by their vulnerabilities Kroenig then shows these arguments through the seven most important cases of democratic versus autocratic rivalries throughout history from the ancient world to the Cold War Finally he analyzes the new era of great power rivalry among the United States Russia and China through the lens of the democratic advantage argument By advancing a hard power argument for democracy Kroenig demonstrates that despite its many problems the U S is better positioned to maintain a global leadership role than either Russia or China A vitally important book for anyone concerned about the future of global geopolitics *The Return of Great Power Rivalry* provides both an innovative way of thinking about power in international politics and an optimistic assessment of the future of American global leadership

China: From Poverty to World Power Paolo Urio, 2024-10-19 The second edition of this book updated to February 24 2024 presents a comprehensive evaluation of the strategy implemented by China to manage its modernization process The author evaluates to what extent the economy has been developed whether the imbalances due to the priority given to economic development have been corrected and whether the improvements of science and technology have allowed China to develop world class high tech sectors and a modern defence Clearly the end of the XX Century saw the fulfilment of Zhou En Lai's four modernizations i.e. the acquisition of power resources that fulfilled Mao's proud 1949 statement we stood up thereby projecting China into the international arena as a re-emerging world power The author insists on the fundamental difference between American and Chinese ideologies as the main drivers of their foreign policy i.e. the extreme rigidity of the former compared to the remarkable flexibility and adaptability of the latter He further explains the consequences of the increasingly aggressive American foreign policy i.e. the US pretence to act as the

leader of the existential struggle between democracy and dictatorship This posture reached its apex during the Ukrainian and the Middle East crises that unveiled the irreversible decline of the West and have become two formidable accelerators of the transition from the unipolar world America made to the multipolar world promoted by China Russia and the BRICS
