*More Chinese Brain Twisters* Baifang, 2007-08-24 Get your family's brains going with 57 more creative calisthenics for the mind. In China for centuries it has been acknowledged that early childhood training supports lifelong intellectual growth. For generations parents have taught their children brain games, delightful amusements that challenge the intellects of young people while appealing to their senses of fun and play. While growing up in China, Baifang learned scores of such games that both challenged and intrigued her. Now she shares 57 new stick puzzle, number and shape games for children and parents everywhere to share and enjoy. A terrific way to stimulate parent-child interaction, these quick and challenging puzzles and brain teasers enhance creative capacity and logic, fostering problem-solving skills and mathematical awareness. Baifang came to the United States from China in 1977 and earned a degree in psychology from the University of California at Berkeley. Since then she has worked on various media and cultural exchange programs with China. She is also the author of *Chinese Brain Twisters*.

**Chinese Brain Twisters** Baifang, 1994-01-01 A smart way to teach children to think logically and creatively. One of the most precious gifts you can offer a child is a sharp mind. The 56 puzzles in this delightful collection were passed down through generations of Chinese families who wanted their children to develop concentration and mental agility. Baifang spent hours enjoying them with her family and friends as she was growing up in the north of China. Now living in San Francisco, Baifang is passing them on to her own children and to families everywhere. Each puzzle inspires clear, precise and inventive thinking. Some teach math concepts, others involve spatial relationships and visualization. All of them have fascinating solutions and help improve memory and problem-solving skills. An inexhaustible source of challenging fun, these are mental calisthenics for stimulating interaction between lively minds from ages 8 to 80.

*Learning and Teaching in the Chinese Classroom* Shane N. Phillipson, Bick-har Lam, 2011-10-01 A major concern of all education authorities around the world is the challenge that schools face in catering for learner diversity That this concern is shared by authorities in East Asia including the Education Bureau EDB of Hong Kong is surprising given the high academic achievement of students from this part of the world This book helps to meet this challenge for teachers in East Asia by focusing on specific research that helps explain the basis for diversity in the Chinese learner Although there are many textbooks that cover the basic principles of educational psychology few do not focus on the Chinese learner This book makes the link between the broad field of educational psychology and how these theories contribute to our understanding of the Chinese learner This book is unique in that it draws on recent research to illustrate the application of these theories thereby helping teachers and students in teacher education progammes understand the variability in student achievement Our book is based on the idea that the Chinese context is in many ways different to other cultural contexts and that teachers can make a difference to the outcomes of student learning We also draw on our many years of experience in educating future teachers where our students want us to focus on the Chinese classroom Our student teachers also want to be educated by professors who are themselves researchers In drawing on research about the Chinese learner we also bring to our student teachers the richness and value of educational research We also encourage our student teachers to think of themselves as professional researchers in terms of developing an understanding of the research literature and in finding solutions to their classroom problems
