Chinese Calculus Of Deterrence:

The Chinese Calculus of Deterrence Allen Sues Whiting, 2001 An international relations classic that reveals the nature of Chinese foreign policy in the late Maoist years

Chinese Warfighting Mark A. Ryan, David Michael Finkelstein, Michael A. McDevitt, 2003 This is the first systematic study of modern China's military campaigns and the actual fighting conducted by the People's Liberation Army since the founding of the People's Republic. It provides a general overview of the evolution of PLA military doctrine and then focuses on major combat episodes from the civil war with the Nationalists to the last significant combat in Vietnam in 1979 in addition to navy and air operations through 1999. In contrast to the many works on the specifics and hardware of China's military modernization, this book discusses such topics as military planning, command and control, fighting and politics, combat tactics and performance, technological catch up and doctrinal flexibility, the role of Mao Zedong, scale and typologies of fighting and deterrence. The contributors include scholars from Mainland China, Taiwan and the United States who draw from a wealth of fresh archival sources

China's Use of Military Force in Foreign Affairs Markus B. Liegl, 2017-03-16 This book explains why China has resorted to the use of large scale military force in foreign affairs. How will China use its growing military might in coming crisis and existing conflicts? This book contributes to the current debate on the future of the Asia Pacific region by examining why China has resorted to using military force in the past. Utilizing fresh theoretical insights on the causes of interstate war and employing a sophisticated methodological framework, the book provides detailed analyses of China's intervention in the Korean War, the Sino-Indian War, China's border clashes with the Soviet Union and the Sino-Vietnamese War. It argues that China did not employ military force in these wars for the sake of national security or because of material issues under contestation as frequently claimed. Rather, the book's findings strongly suggest that considerations about China's international status and relative standing are the principal reasons for China's decision to engage in military force in these instances. When reflecting the study's central insight back onto China's contemporary territorial conflicts and problematic bilateral relationships, it is argued that the People's Republic is still a status seeking and thus highly status sensitive actor. As a result, China's status ambitions should be very carefully observed and well taken into account when interacting with the PRC. This book will be of much interest to students of Chinese foreign policy, Asian politics, military and strategic studies, and IR in general

Chinese Strategic Culture and Foreign Policy Decision-Making Huiyun Feng, 2007-06-11 Examining the major academic and policy debates over China's rise and related policy issues, this book looks into the motivations and intentions of a rising China. Most of the scholarly works on China's rise approach the question at a structural level by looking at the international system and the systemic impact on China's foreign policy. Traditional Realist theorists define China as a revisionist power eager to address wrongs done to them in history, whilst some cultural and historical analyses attest that China's strategic culture has been offensive despite its weak material capability. Huiyun Feng's path breaking contribution to the debate tests these rival

hypotheses by examining systematically the beliefs of contemporary Chinese leaders and their strategic interactions with other states since 1949 when the communist regime came to power The focus is on tracing the historical roots of Chinese strategic culture and its links to the decision making of six key Chinese leaders via their belief systems Chinese Strategic Culture will be of interest to students of Chinese politics foreign policy strategic theory and international relations in general

The Origins of the Cultural Revolution Roderick MacFarquhar,1999-11 This is the final volume in a trilogy that examines the politics personalities economics culture and international relations of China from the mid 1950s to the mid 1960s It seeks to answer the central question Why did Chairman Mao Zedong launch the Cultural Revolution 1966 76 which plunged China into chaos and almost destroyed its Communist Party The Coming of the Cataclysm starts with the great famine of the early 1960s which resulted in tens of millions of deaths and set in train a series of emergency measures that increasingly divided Mao from his comrades in arms His anger that they were prepared to adopt capitalist methods to rescue the country was sharpened by his belief that Moscow had actually gone capitalist and sold out to the imperialist West From 1961 to 1966 the period covered by this volume the increasingly urgent question for Mao was how to prevent a similar revolutionary degeneration in China The Cultural Revolution was his answer Drawing upon new evidence from Party documents personal interviews books and journals MacFarquhar details the growing rift between Mao and his colleagues as they attempted to cope with domestic privation and an increasingly hostile international environment until the Chairman finally decided to smash the unity of the Yan an Round Table by unleashing society against the party state **Secret Wars**

Austin Carson,2018-09-25 Secret Wars is the first book to systematically analyze the ways powerful states covertly participate in foreign wars showing a recurring pattern of such behavior stretching from World War I to U S occupied Iraq Investigating what governments keep secret during wars and why Austin Carson argues that leaders maintain the secrecy of state involvement as a response to the persistent concern of limiting war Keeping interventions backstage helps control escalation dynamics insulating leaders from domestic pressures while communicating their interest in keeping a war contained Carson shows that covert interventions can help control escalation but they are almost always detected by other major powers However the shared value of limiting war can lead adversaries to keep secret the interventions they detect as when American leaders concealed clashes with Soviet pilots during the Korean War Escalation concerns can also cause leaders to ignore covert interventions that have become an open secret From Nazi Germany s role in the Spanish Civil War to American covert operations during the Vietnam War Carson presents new insights about some of the most influential conflicts of the twentieth century Parting the curtain on the secret side of modern war Secret Wars provides important lessons about how rival state powers collude and compete and the ways in which they avoid outright military confrontations

Mao's Military Romanticism Shu Guang Zhang,1995 Zhang argues that war in Korea offered Mao yet another opportunity to expand and consolidate his political power at home while at the same time uniting the Chinese proletariat against Yankee

imperialism and proving to the international community that China had arrived as a major world power

Mao's Generals Remember Korea Xiaobing Li, Allan Reed Millett, Bin Yu, 2001 Fifty years after the Korean conflict what is a forgotten war for some Americans is an aching memory for China With over a million casualties out of the three million soldiers sent into battle that war looms as large for the People's Republic of China PRC barely a year old when North Korea invaded the South as World War II does for most other countries It was the first international war fought by the Chinese Communist regime to halt counterrevolution it was also a war that the Chinese fully expected to win by virtue of not only superiority of numbers but also their soldiers superior political quality This book presents a mosaic of memoirs by key Chinese military commanders from that war drawing not only on their personal papers but also on still classified archives and on Chinese language sources unavailable in English It offers an uncensored behind the scenes story of the Communist campaign from the decision to intervene through the truce negotiations that discloses new information on such facets of the war as strategy and tactics use of propaganda and mobilization of the Chinese population It also reveals the generals concerns about the possible use of nuclear force and the alleged use of biological and chemical weapons by the United States The book contains a wealth of new materials on the Chinese intervention including combat operations logistics political control field command and communications Among those whose recollections are recorded then acting Chief of Staff Nie Rongzhen reveals how party leadership decided on intervention Commander in Chief Peng Dehuai provides personal accounts of major battles and communications with Mao and General Yang Dezhi shares secrets of Chinese military strategy and tactics discussing how the army orchestrated each battle to contend with the better equipped UN forces The volume also features an updated short history of the PRC's conduct of the war based on Chinese sources plus rare photos from Chinese archives that put readers behind the lines from the Chinese side Mao's Generals Remember Korea demonstrates that the PRC continues to draw military diplomatic and strategic lessons from the war it fought fifty years ago with the world's most powerful military force It offers valuable insight into the Chinese way of war and the military mind of Mao that will be a rich resource for Asian and military scholars

United States Naval Institute Proceedings, 2001 **The Long March to Peace** M. Taylor Fravel, 2003 This dissertation seeks to understand the settlement and escalation of territorial disputes focusing specifically on disputes involving China Since 1949 China has defused or resolved 18 of its 23 territorial disputes usually receiving 50 percent or less
