Childs Dreaming:

Children's Dreaming and the Development of Consciousness David Foulkes, 2009-07-01 David Foulkes is one of the international leaders in the empirical study of children's dreaming and a pioneer of sleep laboratory research with children. In this book which distills a lifetime of study Foulkes shows that dreaming as we normally understand it active stories in which the dreamer is an actor appears relatively late in childhood. This true dreaming begins between the ages of 7 and 9. He argues that this late development of dreaming suggests an equally late development of waking reflective self awareness. Foulkes offers a spirited defense of the independence of the psychological realm and the legitimacy of studying it without either psychoanalytic over interpretation or neurophysiological reductionism. *Children's Dreams* Kelly Bulkeley, Patricia M. Bulkeley, 2012-08-02 When a child talks about a vivid nighttime dream it can be difficult for adults to know how to respond. Dream researchers Kelly Bulkeley and Patricia Bulkeley take readers beyond it was just a dream to help children and adults understand why we dream and how dreams can help us unlock our creativity and make sense of our lives. The book introduces readers to the basic psychology and neuroscience of dreaming then explores dreams from early childhood through adolescence. The book focuses on what psychologist C G Jung called the big dreams of childhood intensely memorable dreams that can blaze themselves into children's memories and remain a haunting often inspiring presence throughout their lives. While acknowledging that a complete interpretation of any dream requires personal input from the dreamer the authors show readers how to identify recurrent patterns in dreams that reflect the primal wisdom and the healthy growth of every child's mind and imagination. *Children's Dreams* offers practical advice about how adults can best communicate with children about dreams to offer reassurance and to cultivate a child's imagination and development. The Intellectual and Moral Development of the Child: The intellectual and moral development of the child Gabriel Compayré, 1896 *Dream Time with Children* Brenda Mallon, 2002 Children may not understand where their dreams come from especially when they experience terrifying nightmares that stop them being able to sleep and frighten them when they are awake.
