China Debates The Future Security Environment:

China Debates the Future Security Environment Michael Pillsbury, National Defense University, 2021-05-03 This study offers over 600 selected quotations from the writings of over 200 Chinese authors published from 1994 to 1999. Analysis and interpretation are kept to a minimum so that the Chinese may speak for themselves. Many Chinese scholars assisted with this study by providing hard to get books and articles unfamiliar to most Westerners. Half the authors were interviewed in China. They explained some of the viewpoints in recent debates about the future security environment. Debates in China are generally concealed and frequently authors pretend they do not exist. However, muted they may be, China's debates about the future nevertheless exist and merit attention if we are to understand the premises of China's national strategy and set a baseline from which to measure any future change in these premises.

China Debates the Future Security Environment, 2000 This study's main finding is that for these Chinese authors the future security environment is remarkably clear even if some aspects are still subject to debate. Surprisingly, this clear picture is consistent with what Chairman Mao and Premier Zhou Enlai told President Richard Nixon and Henry Kissinger 25 years ago, namely a multipolar world was emerging and that four nations threatened China: Russia, India, Japan, and America. Although there is some debate among them, Chinese authors consistently express suspicions about other foreign powers, especially the United States, Japan, and India. As Stanford Professor of Political Science Michel Oksenberg states, China's leaders are naturally suspicious of foreign powers. They believe that foreign leaders tend to be reluctant to welcome China's rise in world affairs and would prefer to delay or obstruct its progress. They fear that many in the outside world would prefer to divide China if given the opportunity. China's leaders retain in their minds a strategic map of the points on their periphery that make them vulnerable to foreign influence.

[China Looks at the West](#) Christopher A. Ford, 2015-07-28 Chinese leaders have long been fascinated by the US but have often chosen to demonise America for perceived cultural and military imperialism. Especially under Communist rule, Chinese leaders have crafted and re-crafted portrayals of the US according to the needs of their own agenda and the regime's self image. Christopher A. Ford investigates

what these depictions reveal about internal Chinese politics and Beijing's ambitions in the world today

International Relations Theory and the Asia-Pacific G. John. Ikenberry, Michael Mastanduno, 2003-05-21 What will the Asia Pacific rim look like in the years ahead What tools will international relations theorists need to understand the complex relationship among China Japan and the United States as the three powers shape the economic and political future of this crucial region Some of the best and most innovative scholars in international relations and Asian area studies gather here with the working premise that stability in the broader Asia Pacific region is in large part a function of the behavior of and relationships among these three major powers Each author analyzes the foreign policy behavior of one or more of these states and or relations among them in an effort to make claims about the prospects for regional stability Some of the chapters focus on security relationships some on economic relations and some on the interaction of the two The authors do not promote any particular theoretical perspective but instead draw on the full diversity of theoretical approaches in contemporary international relations scholarship to illuminate international interactions among the Pacific powers The creative collaboration of international relations and Asian studies specialists presents the opportunity to assess the applicability of Western categories of analysis to the beliefs and behaviors of Asian actors The scholars in this volume share the conviction that a deeper understanding of the effects of cultural divides between Asian and American policymakers is essential if the Pacific rim's economic and regional security is to be safeguarded

Challenges to Global Security Hussein Solomon, 2008 Ours is an age of great upheaval where change sometimes appears to be the only constant Three of the most important forces driving such change are globalization regionalization and democratization This substantial work makes a concerted attempt to understand these forces and to show how they impact on the vitally important question of global security The volume brings together a wide range of scholars who hold diverse views and who collectively make a very significant contribution to current discourses within international relations and contemporary geopolitics Such is the book's breadth that it covers every region of the world addressing in turn security problems in the USA Latin America South Asia South East Asia Europe Russia and environs the Middle East and Africa Each discourse receives substantial coverage from economics and politics to religion religious fundamentalism and human rights Challenges to Global Security offers one of the richest comparative volumes yet to be published on the subject and will have strong appeal to students scholars and policymakers in the fields of international relations ethics and politics
