Olivier**

2014 Exemplar Chemistry Grd10:

Starting Life as a Midwife Michelle Gray, Ellen Kitson-Reynolds, Allison Cummins, 2019-04-10 This volume explores the unique challenges midwifery graduates face as they move into practice. It identifies the similarities and differences in midwifery education, regulation and clinical practice faced by graduate midwives in all continents, examining the various support systems available for graduate midwives in many countries and identifying the common strategies, formal and informal, and approaches that have proved to be effective in supporting midwifery graduates. The book volume brings together the experiences of new midwives starting out in registered practice to share the challenges and triumphs during their transition to confident practitioners. It identifies, explains and details both established and innovative new mechanisms in place to support new midwives in each country and examines the effects the experiences of transitioning to practice may have on future professional practice, resilience and sustainability. Lack of support during the new graduate transition to practice has been associated with early attrition from the midwifery profession. Stress, disillusion and horizontal violence have been identified as factors that influence midwifery attrition rates. Exploration of the various support mechanisms currently available in different countries may stimulate the sharing of best practices in providing new midwives with transition to practice programmes and generate further research. Each chapter is harmonized to facilitate the comparison between countries and the maternity services context is explained using each country's specific legislation, regulation and registration of midwives. The preparation of midwifery students for qualified practice is outlined to explain how midwifery students are trained and socialized into the profession, mentored in their placements and then transitioned to registered midwife status. This book appeals to midwives, managers, educators and newly graduated, interested in international midwifery practice.

Science Education Research and Practice in East Asia: Trends and Perspectives Huann-shyang Lin, John K. Gilbert, Chi-Jui Lien, 2016-09-20 This book is a collaborative product of an official project approved by the East Asian Association for Science Education (EASE), one of the most important professional societies of science education in Asia. This EASE book is compiled with a unique approach. It consists of well-structured four sections: A The Historical Development of Science Education in East Asia; B The Achievements of Science Education Research in East Asia; C Science Teacher Training in East Asia; and D Some Challenges to Research in Science Education in East Asia. Its fifteen chapters are co-authored, collaborated by renowned scholars from regions of East Asia. The book successfully integrated and consolidated the research findings, curricular developments and science teaching practices that have shaped ongoing educational agenda and student learning outcome in an unprecedented approach. Six Regional Coordinators from Mainland China, Hong Kong, Japan, Korea,

and Taiwan worked together with Editors and more than fifty science educators to assure the book project adequately reflects the trends and practices in this region. The six Regional Coordinators are 1 Prof Weiping HU Shaanxi Normal University 2 Prof Winnie SO Wing Mui The Education University of Hong Kong 3 Prof Masakata OGAWA Tokyo University of Science 4 Prof Jinwoong SONG Seoul National University 5 Prof Huann shyang LIN National Sun Yat sen University 6 Prof Chi jui LIEN National Taipei University of Education. This book intends not only to serve as references but also a complement of existing perspectives from western countries. Insights gained from the integration and consolidation of East Asian developmental trends and perspectives would allow science educators teachers and policy makers make wise decision for future advancements for their own countries regions.

Handbook of Research on Science Learning Progressions Hui Jin, Duanli Yan, Joseph Krajcik, 2024-07-30. Gathering contributions from leading scholars around the world, this handbook offers a comprehensive resource on the most recent advances in research surrounding the theories, methodologies, and applications of science learning progressions. Researchers and educators have used learning progressions to guide the design and alignment of curriculum, instruction, and assessment, and to help students learn scientific knowledge and practices in a coherent and connected way across multiple years. This handbook lays out the development and current state of research in this field across four sections: learning progression theories and methodologies; learning progressions to promote student learning; teachers' learning and use of learning progressions; and new technology in learning progression research. Featuring internationally recognized experts in learning progression research, as well as up and coming voices, the *Handbook of Research on Science Learning Progressions* offers a defining new resource for researchers, teachers, and teacher educators and curriculum and assessment developers in science education.
