Here Come The Dinosaurs:

Behaviour, Safety and Well Being Andrew Moffatt, 2017-07-05 The new Ofsted framework evaluates the behaviour and safety of pupils at the school This resource provides over 100 lesson plans promoting recognition of different emotions and behaviours practice in responding to those different emotions and behaviours good behaviour towards and respect for other young people and adults Each lesson plan is linked to a children s book and references SEAL Lessons can support Literacy PSHE and citizenship Lesson plans are bracketed into year groups and five or six week modules that give schools the opportunity to deliver specific projects on anti bullying safeguarding pupil voice and transition There are also modules covering emotions such as anger loneliness excitement jealousy kindness pride and confidence This is a comprehensive accessible and invaluable tool for every classroom

Young Children Visit Museums Margaret Carr, Brenda Soutar, Leanne Clayton, Bronwen Cowie, Jeanette Clarkin-Phillips, Shelley Butler, 2022-09-06 Bringing different cultural perspectives on creativity with them teachers and children in two early childhood education sites in Aotearoa New Zealand were using museum visits as jumping off places to hone their creative capacity building As a contribution to Tim Ingold s discussion of anthropology and as education and also finding John Dewey s writing valuable specifically his framing of enduring attitudes the authors employ a navigation metaphor throughout the discussion They describe a coming together of four Cultural Anchors thinking from materials with four Coordinates creative capacity builders to describe ways in which the children were making creative sense of the museum exhibits while at the same time gathering information about them They take these travel metaphors from a star cluster in the southern hemisphere night sky Matariki which provided early sea going M ori with guidance as they navigated wide stretches of ocean in their sea going canoes to reach Aotearoa New Zealand A M ori immersion early childhood centre and school and a New Zealand kindergarten provided lively examples of children s and teachers responses to the treasured artefacts taonga in their local museums The book describes an ecosocial framing from little to big and illustrates the different cultural perspectives on creativity The Mana Tamariki kaiako teachers gifted us a title He taonga he rerenga arorangi Where there are treasured objects the spirit is nurtured and creativity will be inspired

A Cultural-Historical Study of Children Learning Science Marilyn Fler, Niklas Pramling, 2014-10-01 This book moves beyond the traditional constructivist and social constructivist view of learning and development in science It draws upon cultural historical theory in order to theorise early childhood science education in relation to our currently globalised education contexts The book argues that concept development in science for young children can be better theorised by using Vygotsky s concept of Imagination and creativity Vygotsky s theory of play and his work on higher mental functions particularly the concept of inter and intrapsychological functioning Key concepts are extracted from the theoretical section of the book and used as categories for analysis in presenting evidence and new ideas in the second section of the book In this second part of the book the authors examine how science knowledge has been constructed within particular countries around

the globe where empirical research in early childhood science education has occurred The third part of the book examines the nature of the encounter between the teacher and the child during science learning and teaching In the final part of the book the authors look closely at the range of models and approaches to the teaching of early childhood science that have been made available to early childhood teachers to guide their planning and teaching They conclude the book with a theoretical discussion of the cultural historical foundation for early childhood science education followed by a model of teaching scientific concepts to young children in play based settings including homes and community contexts

eras in humankind's vexed relationship with nature Ascension is a novel about the end of nature or rather the end of three
 natures the time just before Darwin changed the natural world the 1980s just as the digital and genetic revolutions begin to
 replace nature with environment and today a time when we have the ability to manipulate nature at both the scale of the
 planet and at the genome The narrative follows three different biologists on the brink of each of these cultural extinctions to
 explore how nature occupies our imaginations and how our imaginations bring the natural world and our place in it into
 existence Ascension is a story of how we continually remake the world and are in turn remade by the new nature we've
 created It is the story of humans yearning to understand their families themselves and the world they live in as it comes to a
 close leaving them to anticipate what will follow Rich in visual depictions of the natural world from nineteenth century
 engraving and paintings to twentieth century photography and twenty first century databases Ascension uses the materials of
 three eras to drive home our inability to escape nature and the ways our fates are irrevocably bound together even as our
 actions usher in an end time
