Rapp, 2022-10-07 Microfluidics Modeling Mechanics and Mathematics Second Edition provides a practical lab based approach to nano and microfluidics including a wealth of practical techniques protocols and experiments ready to be put into practice in both research and industrial settings This practical approach is ideally suited to researchers and R D staff in industry Additionally the interdisciplinary approach to the science of nano and microfluidics enables readers from a range of different academic disciplines to broaden their understanding Alongside traditional fluid transport topics the book contains a wealth of coverage of materials and manufacturing techniques chemical modification surface functionalization biochemical analysis and the biosensors involved This fully updated new edition also includes new sections on viscous flows and centrifugal microfluidics expanding the types of platforms covered to include centrifugal capillary and electro kinetic platforms Provides a practical guide to the successful design and implementation of nano and microfluidic processes e g biosensing and equipment e g biosensors such as diabetes blood glucose sensors Provides techniques experiments and protocols that are ready to be put to use in the lab or in an academic or industry setting Presents a collection of 3D CAD and image files on a companion website      *New Software for Mathematical Package Maple of Releases 6, 7 and 8* Victor Aladjev, Marijonas Bogdevicius, Olegas Prentkovskis, 2002

**Maple 9** M. B. Monagan, 2003      **Maple V Programming Guide** Waterloo Maple Incorporated, 1998 Maple V Mathematics Programming Guide is the fully updated language and programming reference for Maple V Release 5 It presents a detailed description of Maple V Release 5 the latest release of the powerful interactive computer algebra system used worldwide as a tool for problem solving in mathematics the sciences engineering and education This manual describes the use of both numeric and symbolic expressions the data types available and the programming language statements in Maple It shows how the system can be extended or customized through user defined routines and gives complete descriptions of the system s user interface and 2D and 3D graphics capabilities      *Computer Algebra Recipes* Richard H. Enns, George C. McGuire, 2007-02-26 Computer algebra systems are revolutionizing the teaching the learning and the exploration of science Not only can students and researchers work through mathematical models more efficiently and with fewer errors than with pencil and paper they can also easily explore both analytically and numerically more complex and computationally intensive models Aimed at science and engineering undergraduates at the sophomore junior level this introductory guide to the mathematical models of science is filled with examples from a wide variety of disciplines including biology economics medicine engineering game theory mathematics physics and chemistry The topics are organized into the Appetizers dealing with graphical aspects the Entrees concentrating on symbolic computation and the Desserts illustrating numerical simulation The heart of the text is a large number of computer algebra recipes based on the Maple 10 software

system These have been designed not only to provide tools for problem solving but also to stimulate the reader's imagination Associated with each recipe is a scientific model or method and an interesting or amusing story accompanied with a thought provoking quote that leads the reader through the various steps of the recipe Each section of recipes is followed by a set of problems that readers can use to check their understanding or to develop the topic further This text is the first of two volumes the advanced guide aimed at junior senior graduate level students dealing with more advanced differential equation models

Geometric Computation Falai Chen, Dongming Wang, 2004-03-29 This book contains tutorial surveys and original research contributions in geometric computing modeling and reasoning Highlighting the role of algebraic computation it covers surface blending implicitization and parametrization automated deduction with Clifford algebra and in real geometry and exact geometric computation Basic techniques advanced methods and new findings are presented coherently with many examples and illustrations Using this book the reader will easily cross the frontiers of symbolic computation computer aided geometric design and automated reasoning The book is also a valuable reference for people working in other relevant areas such as scientific computing computer graphics and artificial intelligence
