Lesson Plans Larry Zafran, 2010-01-19 This is the third book in the Math Made a Bit Easier series by independent math tutor Larry Zafran. It is a book of sixty lesson plans for tutors, parents, and homeschoolers. Each lesson plan includes all the components of a typical classroom lesson, such as aim, motivation, warm-up exercises, demonstrative examples, questions for thought and discussion, and connections to earlier and later material. The math content in this book is directly aligned and ideally used in conjunction with the first book of the series and its companion workbook of practice exercises. It covers the topics which comprise the foundation of math, beginning with lessons in basic arithmetic, followed by basic operations, negative numbers, fractions, decimals, percents, and basic probability and statistics. If these topics are not completely mastered, later work will prove to be quite difficult. This is especially true of algebra. The book includes a chapter on how to be an effective math tutor, as well as a chapter on how to optionally incorporate meditation instruction to help students get into a relaxed and alert state of mind, which is ideal for learning math and taking exams. **Math for Everyone Teachers Edition**

Nathaniel Rock, 2007 Tired of ten-pound math textbooks. Tired of math textbooks with 700 to 1,000 pages. Tired of massive student failure in gatekeeper math courses like Algebra I. Tired of math-phobic students and their parents exclaiming "I hate math." Maybe it is time to try a different curriculum. Math For Everyone is a curriculum designed to promote massive student and teacher math success. Each year's content in the six math courses: 7th Grade Math, Algebra I, Geometry I, Algebra II, Math Analysis, and Calculus is boiled down into its essential vocabulary and 5-7 key concepts, with particular attention paid to clarity and articulation between courses. Assessment includes old favorites as well as authentic assessment with rubrics and grading advice included. No text is longer than 80 pages, as the 5-7 key concepts can be amply demonstrated and practiced in this amount of space. Nathaniel Max Rock is an educator since 2001 and the author of more than a dozen education books.
