Routledge Handbook of National and Regional Ocean Policies Biliana Cicin-Sain, David Vanderzwaag, Miriam C. Balgos, 2015-05-15 This comprehensive handbook prepared by leading ocean policy academics and practitioners from around the world presents in depth analyses of the experiences of fifteen developed and developing nations and four key regions of

the world that have taken concrete steps toward cross cutting and integrated national and regional ocean policy All chapters follow a common framework for policy analysis While most coastal nations of the world already have a variety of sectoral policies in place to manage different uses of the ocean such as shipping fishing oil and gas development in the last two decades the coastal nations covered in the book have undertaken concerted efforts to articulate and implement an integrated ecosystem based vision for the governance of ocean areas under their jurisdiction This includes goals and procedures to harmonize existing uses and laws to foster sustainable development of ocean areas to protect biodiversity and vulnerable resources and ecosystems and to coordinate the actions of the many government agencies that are typically involved in oceans affairs The book highlights the serious conflicts of use in most national ocean zones and the varying attempts by nations to follow the prescriptions emanating from the 1982 UN Law of the Sea Convention and the outcomes of the 1992 2002 and 2012 sustainable development summits The interrelationship among uses and processes in the coast and ocean requires that ocean governance be integrated precautionary and anticipatory Overall the book provides a definitive state of the art review and analysis of national and regional ocean policies around the world [Urban Heritage, Development and Sustainability](#) Sophia Labadi, William Logan, 2015-10-23 More than half of the world's population now live in urban areas and cities provide the setting for contemporary challenges such as population growth mass tourism and unequal access to socio economic opportunities Urban Heritage Development and Sustainability examines the impact of these issues on urban heritage considering innovative approaches to managing developmental pressures and focusing on how taking an ethical inclusive and holistic approach to urban planning and heritage conservation may create a stronger basis for the sustainable growth of cities in the future This volume is a timely analysis of current theories and practises in urban heritage with particular reference to the conflict between and potential reconciliation of conservation and development goals A global range of case studies detail a number of distinct practical approaches to heritage on international national and local scales Chapters reveal the disjunctions between international frameworks and national implementation and assess how internationally agreed concepts can be misused to justify unsustainable practices or to further economic globalisation and political nationalism The exclusion of many local communities from development policies and the subsequent erosion of their cultural heritage is also discussed with the collection emphasising the importance of grass roots heritage and exploring more inclusive and culturally responsive conservation strategies Contributions from an international group of authors including practitioners as well as leading academics deliver a broad and balanced coverage of this topic Addressing the interests of both urban planners and heritage specialists Urban Heritage Development and Sustainability is an important addition to the field that will encourage further discourse **Yearbook of International Organizations 2014-2015, Volumes 1a & 1b (Set)** Union of International Associations, 2014-06-16 Volume 1 A and B covers international organizations throughout the world comprising their aims activities and events [Removing Tax Barriers to China's Belt and Road Initiative](#) Michael
