Different Like A Zoo:

Raising 4 Dimensional Children in a 2 Dimensional World Tim McCarthy, 2021-07-15 Worried about Whether You're being a Good Parent Maybe you have a newborn and you don't know what to expect Maybe your child gets angry and you don't understand why Maybe your child spends too much time on the Phone or Gaming Don't fret You have what it takes to get the results you desire with a little help New Knowledge is the First Step It's hard to solve a problem if you don't understand the problem You probably never realized that your child actually develops in 4 Dimensions The Physical Mental Emotional and Spiritual Neglecting even one dimension can be a source of problems When you understand your child's capabilities and limitations in each of the 4 Dimensions at each specific age you will see more clearly why he or she is acting that way Taking Action is the Second Step Knowledge isn't really power until it is put into action Once you have the theory you need practical solutions that will give you results You need clear actions you can take with your child to help him/her develop in each dimension Raising 4 Dimensional Children in a 2 Dimensional World is a book that gives you both It has the knowledge you need and it also gives you over 400 educational and fun activities to help your child reach new milestones in growth in each dimension It's the Instruction Manual for Parenting that you didn't get with your child Parenting can be tough but you don't need a degree in psychology or education to raise your child because this book has the results of years of educational and psychological research explained in simple language then coordinates those results with easy and fun activities that your children will love Now is the time to develop a new relationship with your children using activities to enjoy the quality time you have after school after work and on weekends Parenting can be easy and even fun when you have the right tools You CAN do this

Ecologies of Bronze Age Rock Art Fredrik Fahlander, 2024-07-15 A consideration of the rock art of the M laren bay region exploring the potential efficacy of petroglyphs as physical devices through organization design and articulation The Bronze Age 1700 500 BCE petroglyphs of southern Scandinavia comprise a unique tradition of rock art in northern Eurasia Despite a limited repertoire of motifs such as cupmarks boats anthropomorphs zoomorphs podomorphs and circles it shows great variability in design elaboration and articulation This book is a study of the M laren region in southern central Sweden that includes one of the most prominent rock art clusters of southwest Uppland as well as the hinterland of S dermanland county The rock art in this region is studied on three scales regional local and particular This allows for comparisons between dense and small sites an exploration of how the Bronze Age rock art tradition developed over time in the area and equally how the design and articulation of certain motifs relate to contemporary settlements waterways and varying environmental settings Patterns and structures in the distribution and articulation of the petroglyphs show that the different motifs are not only visual expressions but very much material enactments The motifs often physically relate to each other the flows of water and the microtopography and mineral contents of the rocks The study is therefore not as much about rock art as images and symbols as it is about the ecology of rock art the web of social and physical relations in which it was enacted and employed From this perspective the petroglyphs are seen as petrofacts that is something akin to tools or devices articulated in various ways to affect humans other than humans and the animacies of the coastal milieus where they were made
