Furthermore both learners and teachers in Mozambican secondary schools have profiles in at least one of these Social Network Sites The study shows that they generally access such sites for entertainment and sharing and never for learning Among different reasons lack of knowledge about the learning tools within social networks and low creativity and innovation in teaching are decisive to low exploitability of the tools The research consists of both qualitative and quantitative methods and the data result from observations questionnaires and interviews techniques set in Social Network Sites especially Facebook to bring reliable and verifiable samples of the data analyzed The research demonstrates how relevant the Social Network Sites are for Language Classroom Interaction and language acquisition Furthermore an awareness of these tools can possibly be significant to educational contexts to encourage language learners to interact and collaborate with each other and with native speakers of the target language through a number of online communication tools such as chat walls videos conference etc provided by these platforms
