Difficult Choices:

Difficult Choices Richard C. Bush,2021-04-13 How Taiwan can overcome internal stresses and the threat from China Taiwan was a poster child for the third wave of global democratization in the 1980s It was the first Chinese society to make the transition to democracy and it did so gradually and peacefully But Taiwan today faces a host of internal issues starting with the aging of society and the resulting intergenerational conflicts over spending priorities China's long term threat to incorporate the island on terms similar to those used for Hong Kong exacerbates the island's home grown problems Taiwan remains heavily dependent on the United States for its security but it must use its own resources to cope with Beijing's constant intimidation and pressure How Taiwan responds to the internal and external challenges it faces and what the United States and other outside powers do to help will determine whether it is able to stand its ground against China's ambitions The book explores the broad range of issues and policy choices Taiwan confronts and offers suggestions both for what Taiwan can do to help itself and what the United States should do to improve Taiwan's chances of success **Hard**

Choices, Easy Answers R. Michael Alvarez,John Brehm,2020-10-06 Those who seek to accurately gauge public opinion must first ask themselves Why are certain opinions highly volatile while others are relatively fixed Why are some surveys affected by question wording or communicative medium e.g telephone while others seem immune In *Hard Choices Easy Answers* R Michael Alvarez and John Brehm develop a new theory of response variability that by reconciling the strengths and weaknesses of the standard approaches will help pollsters and scholars alike better resolve such perennial problems Working within the context of U S public opinion they contend that the answers Americans give rest on a variegated structure of political predispositions diverse but widely shared values beliefs expectations and evaluations Alvarez and Brehm argue that respondents deploy what they know about politics often little to think in terms of what they value and believe Working with sophisticated statistical models they offer a unique analysis of not just what a respondent is likely to choose but also how variable those choices would be under differing circumstances American public opinion can be characterized in one of three forms of variability conclude the authors ambivalence equivocation and uncertainty Respondents are sometimes ambivalent as in attitudes toward abortion or euthanasia They are often equivocal as in views about the scope of government But most often they are uncertain sure of what they value but unsure how to use those values in political choices

Neurostimulation: Exploring Perceptual & Cognitive Enhancement Adam Joseph Toth,Mark J. Campbell,Adam Bruton,2025-08-06 Research investigating the use of electrical or magnetic stimuli to alter the electrophysiology of the central and peripheral nervous systems has flourished in recent years The popularity of these techniques largely stems from their ability to create temporary lesions or enhancements in nervous system function To date a plethora of literature has emerged examining the role of neurostimulation for augmenting motor function due to the relative ease of objectively quantifying changes in behavior performance and even motor evoked potential amplitudes within individual muscles

However the role of neurostimulation in enhancing perceptual and cognitive abilities is under examined and is an area that is now continually gaining research attention Evaluating the role of various forms of neurostimulation on cognitive and perceptual abilities can be challenging due to the lack of control over the underlying neural activity in the central nervous system and the sensitivity with which current measurement tools and tasks quantify cognitive and perceptual functioning This research topic aims to facilitate the publication of high quality methodologically sound research that addresses the quantification and effect that various forms of neurostimulation have on cognitive and perceptual processes across the lifespan In doing so we endeavor to help advance the field of neurostimulation with respect to robustly mapping the effect of neurostimulation on cognitive and perceptual performance

Human Predicaments John Kekes,2016-06-22 The philosopher and author of *How Should We Live* presents a clear and provocative discussion of issues such as boredom hypocrisy evil and innocence Stephen Mulhall University of Oxford In this book John Kekes draws on anthropology history and literature to offer practical insights into the common predicaments we all face in our daily lives Each chapter offers new ways of thinking about a common fundamental problem such as facing difficult choices uncontrollable contingencies complex evaluations the failures of justice the miasma of boredom and the inescapable hypocrisies of social life In each case Kekes discusses how others in different times and cultures have approached similar issues Kekes examines what is good bad instructive and dangerous in the Hindu caste system Balinese role morality the sexually charged politics of the Shilluk the religious passion of Cortes and Simone Weil the fate of Colonel Hiromichi Yahara during and after the battle for Okinawa the ritual human sacrifices of the Aztecs and the tragedies to which innocence may lead In doing so he enlarges our understanding of the possibilities available to us as we struggle with the common obstacles of modern life

Making Difficult Decisions Peter J. A. Shaw,2010-02-04 You are faced with so many difficult decisions Often your decision making seems random It can be swayed by different situations and emotions You need to be more rigorous in the way you make decisions and yet you have very little time to do so Experience from others who have made tough decisions and a framework to help you do so would be invaluable The courage to make decisions is sometimes a bit elusive It is difficult to find the calmness to be able to make and live with those decisions There is so much that can be learned from the experience of others After working through this book you will have the courage of your convictions and the ability to make difficult decisions count The book sets out a framework for making difficult decisions that has been tried and tested It has been used successfully in one to one coaching with senior leaders in both the public private and voluntary sectors The framework is built on the following strands Clarity Conviction Courage and Communication

The Phenomenology of Acts of Choice Honoria Marian Wells,1927

Tough Choices Len Woods,1998 An innovative small group resource Tough Choices helps men confront 52 difficult issues apply biblical truth to life and discover accountability

The Book of Hard Choices James A. Autry,Peter Roy,2006-12-26 There are a thousand acts of duplicity and dishonesty every day some large and some small some of which

undoubtedly take place in your workplace The question for all of us is Are we going to resist or just play along the path of least resistance The first hard choice a person of integrity must make is to choose to live both personally and professionally in a way that embodies integrity The power of this book comes from the real life in the workplace experiences that these executives have been so generously willing to share None had easy choices but that s the point Integrity is not about easy choices it s about the courage to make the right choices From The Book of Hard Choices All of us like to think that in any given situation we d act with integrity and do the right thing But what happens when we get to work each morning Do the same rules we follow in our personal lives apply to our work lives The lines between right and wrong become blurred when we must weigh our obligations to our employer against our own ideas about what is right and wrong Should altruism trump profit even to the detriment of the organization When should you step in to protect an employee and when should the employee be left to take the heat If the CEO is up to some unethical accounting should you always risk your job and the company s reputation to sound the alarm These are the hard choices the dilemmas that put your integrity to the test and require you to look beyond organizational policy and industry precedents to find an answer that reflects your personal sense of justice The Book of Hard Choices goes to the heart of these difficult decisions James Autry and Peter Roy experienced executives themselves interviewed numerous leaders about the tough decisions they ve made on the job They spoke with people like former Starbucks president Howard Behar Iowa Cubs owner Michael Gartner and Governor Tom Vilsack of Iowa as well as entrepreneurs military officials members of the clergy and a whole host of leaders The authors dig into the thinking process these people went through as well as the emotional strain the self doubt and the fear of a wrong decision s impact on their business family or coworkers Not everyone in this book made the right choice but all of them were forced to examine their values and make decisions in complicated circumstances The result is hard won wisdom on how to navigate the ethical gray areas of work life from daily challenges to possible career ending choices and make the best possible decisions in the most difficult situations

How We Judge Intelligence Egbert Hockey Magson,1926 **Hard Science, Hard Choices** Sandra Ackerman,2006 Advances in neuroscience research are rapidly bringing new and complex issues to the forefront of medical and social ethics and scholars from diverse fields have been coming together to debate the issues at stake Acclaimed science writer Sandra Ackerman witnessed one such gathering and here she skillfully synthesizes those proceedings into a concise presentation of the challenges that neuroscience and neuroethics currently face Top scholars and scientists in neuroscience and ethics convened at the Library of Congress in Washington D C in May 2005 They included Michael Gazzaniga director of the Center for Cognitive Neuroscience at Dartmouth College Marcus Raichle of the Washington University School of Medicine in St Louis Harvard University provost Steven Hyman Judy Illes cofounder of the Stanford Brain Research Center University of Virginia bioethicist Jonathan Moreno Stacey Tovino of the Health Law and Policy Institute at the University of Houston Law Center and Stanford law professor Hank Greely Ackerman weaves the

invigorating arguments and discussions among these and other prominent scholars into a seamless and dynamic narrative She reveals the wide array of issues that have emerged from recent research including brain imaging free will and personal responsibility disease diagnosis and prediction brain enhancement and the potential social political and legal ramifications of new discoveries Translating these complex arguments into an engrossing account of neuroethics she offers a rare view of science and ethics in the making *Swamp V. Feminist Ethics Claudia Card, 1991 Fifteen essays address subjects ranging from the history of feminist ethics to the logic of pluralist feminism and present feminist perspectives on such topics as terrorism bitterness women trusting other women and survival and ethics Paper edition unseen 14 95 Annotation copyrighted by Book News Inc Portland OR **Rehnquist Justice** Earl M. Maltz, 2003 With seven of its justices appointed by Republican presidents today s Supreme Court has significantly altered America s legal landscape since 1986 by tilting constitutional jurisprudence to the right That was the goal of Presidents Reagan and Bush in filling court vacancies and has been felt in cases related to federalism economic rights and affirmative action However liberal issues such as abortion have moved only marginally to the right while rulings by the Court on school prayer and gay rights have moved constitutional doctrine slightly to the left In this collection of original articles prominent constitutional scholars are joined by new voices from the cutting edge of academia to subject the Rehnquist Court to closer scrutiny and to show that its brand of conservatism is less extreme than many have supposed Reflecting views across the political spectrum the contributors help readers understand the Court dynamic its constrained conservatism and the forces that shape constitutional law in general As these authors show the overall pattern of decision making in the Rehnquist era cannot be attributed to any single unified approach to constitutional analysis Instead today s Court can only be understood as the product of a complex interaction among individual justices each with an idiosyncratic view of the proper interpretation of the Constitution and the role of the Court in the American political system These provocative essays are designed to provide readers with insight into this interaction by focusing on each member of the bench From the staunch conservatism of Clarence Thomas to the accommodationism of Sandra Day O Connor to the liberal constitutionalism of David Souter the essays analyze the unique approach of each justice to interpreting the Constitution They also show that the current justices are the product of a nomination and confirmation process that has undergone a major transformation in recent decades one which favors experienced often unknown jurists over high profile public servants By concentrating attention on its members Rehnquist Justice allows us to better understand the Supreme Court as a whole

And by assessing today's judiciary in light of a public philosophy that looks askance at government it shows us that the Supreme Court has truly become a mirror of its times
