Dynamics Of Focus Structure

Robert R. Redfield

Dynamics Of Focus Structure:

The Dynamics of Focus Structure Nomi Erteschik-Shir, 1997 In this book Nomi Erteschik Shir develops a new theory of focus structure integrating insights from syntax semantics phonology and pragmatics She explores the role of focus structure in grammar examining the interface between focus structure and syntax the semantics of focus structure and the intonation associated with it Dr Shir defines a grammatical level of f structure focus structure which is an annotated s structure in which topic and focus constituents are marked F structure feeds both PF Phonological Form and semantics and is sensitive to lexical information Dr Shir argues that f structure and not LF Logical Form is the input to a semantic rule of predication One of the major results of Dr Shir s analysis is that wh movement turns out to be subject to the same constraint which accounts for anaphora and other subject object asymmetries

Topic-Focus Articulation, Tripartite Structures, and Semantic Content Eva Hajicová, Barbara B.H. Partee, P. Sgall, 2013-03-09 1 1 OBJECTIVES The main objective of this joint work is to bring together some ideas that have played central roles in two disparate theoretical traditions in order to contribute to a better understanding of the relationship between focus and the syntactic and semantic structure of sentences Within the Prague School tradition and the branch of its contemporary development represented by Hajicova and Sgall HS in the sequel topic focus articulation has long been a central object of study and it has long been a tenet of Prague school linguistics that topic focus structure has systematic relevance to meaning Within the formal semantics tradition represented by Partee BHP in the sequel focus has much more recently become an area of concerted investigation but a number of the semantic phenomena to which focus is relevant have been extensively investigated and given explicit compositional semantic analyses The emergence of tripartite structures see Chapter 2 in formal semantics and the partial similarities that can be readily observed between some aspects of tripartite structures and some aspects of Praguian topic focus articulation have led us to expect that a closer investigation of the similarities and differences in these different theoretical constructs would be a rewarding undertaking with mutual benefits for the further development of our respective theories and potential benefit for the study of semantic effects of focus in other theories as well

Shifting the Focus Daniel Wedgwood, 2005 How direct is the mapping between linguistic constructions and their interpretations Much less direct than we generally assume according to this book Extending current ideas from frameworks like Relevance Theory pragmatic inference is shown to have a far greater role than it is normally afforded making crucial contributions to semantic representations This necessitates a radical new perspective in formal linguistics we must isolate what is attributable to inference before we can even identify what the grammar should account for Addressing fundamental assumptions of linguistic theory and tapping into significant new ideas in frameworks like Dynamic Syntax this book outlines and illustrates an approach to grammar that addresses actual mechanisms of interpretation in context instead of assuming a direct interface between static syntactic representations and semantics Theoretical arguments are supported by detailed formal and informal linguistic analysis at a key meeting point of syntax semantics and pragmatics information structure An in depth case study of syntactic focus in Hungarian demonstrates how an unusually wide range of complex phenomena including quantificational and aspectual constructions and the syntax of negation can be accounted for by the linguistic encoding of radically underspecified semantic procedures plus rich pragmatic reasoning Both in its clear argumentation for a radical new theoretical perspective and in its no

Logical Aspects of Computational Linguistics, 1997 **The Linguistic Review**, 2003 **Recruiting for Uncle Sam** David R. Segal, 1989 Which citizens have fought America's wars Which ones should fight in the future and how should they be recruited Should military or other national service be an obligation for every citizen David Segal's probing look at the complex issues behind these questions tells us much about the changing manpower needs of our armed forces and about the evolution of civil military relations in the United States Segal analyzes the mobilization contributions and limitations of drafted reservist and volunteer forces from the early days of the republic to the present In the process he shows how Americans have come to separate the benefits of citizenship from service to their country Symptomatic of this separation is the current reliance on an all volunteer military a system that treats military service more as an occupation and opportunity for self advancement than as a civic duty and obligation Drawing on a vast interdisciplinary literature in American history sociology political science and economics Segal illuminates the ways

demographics weapons technology international relations scientific management and social policies have all affected the composition of America s armed forces He also shows how the military anticipated and expanded the American welfare system and played a pivotal role in creating better opportunities for minorities and women The capabilities and performance of U S armed forces in future conflicts will depend on a thorough understanding of and informed response to the crucial manpower issues Segal discusses His thoughtful study should be required reading for military professionals and policymakers and will be of interest to anyone concerned about the future of this country s armed forces **The Journal of**
