## **Dynamics Of Soviet Defense Policy:**

The Dynamics of Soviet Defense Policy Bruce Parrott,1990-01-01      **Tides of Fortune** Zack Cooper,2025-02-25 An ambitious look at how the twentieth century's great powers devised their military strategies and what their implications mean for military competition between the United States and China How will the United States and China evolve militarily in the years ahead Many experts believe the answer to this question is largely unknowable But Zack Cooper argues that the American and Chinese militaries are following a well trodden path For centuries the world's most powerful militaries have adhered to a remarkably consistent pattern of behavior determined largely by their leaders' perceptions of relative power shifts By uncovering these trends this book places the evolving military competition between the United States and China in historical context Drawing on a decade of research and on his experience at the White House and the Pentagon Cooper outlines a novel explanation for how militaries change as they rise and decline *Tides of Fortune* examines the paths of six great powers of the twentieth century tracking how national leaders adjusted their defense objectives strategies and investments in response to perceived shifts in relative power All these militaries followed a common pattern and their experiences shed new light on both China's recent military modernization and America's potential responses      **Defense and Dependence in a Global Economy** Raymond Vernon,Ethan B. Kapstein,1992 Ten essays present comparative perspectives on the tension between the desire for inexpensive military products from foreign countries and the need to control supplies essential to national security Annotation copyrighted by Book News Inc Portland OR      **Kennan Institute Publications** Kennan Institute for Advanced Russian Studies,1995      *State Building and Military Power in Russia and the New States of Eurasia* Bruce Parrott,1995 The outgrowth of a conference jointly conducted by the Russian Littoral Project the Department of War Studies at King's College London and the International Institute for Strategic Studies this volume analyzes the interplay between state building and military power in the post-Soviet states Focusing on conventional military forces it explores and clarifies the influences shaping conceptions of national security and military policies in each country These influences include shifting national identities political and economic upheaval and a volatile external environment Paper edition unseen 22 95 Annotation copyright by Book News Inc Portland OR      *Nuclear Strategy in a Dynamic World* Donald M. challenges to security that the Alliance faces in the 1980s and discusses internal problems that affect member nations ability to deal with them Country studies of the four largest European members of the Alliance systematically examine domestic constraints on security policy and assess probable approaches for the 1980s A more general analysis is offered on how this situation affects the Allies ability to work together in dealing with their common security problems The need to integrate economic and military requirements is also discussed

Wiczynski,1996 The Cumulative Book Index ,1991 A world list of books in the English language *Bulletin of the Atomic Scientists* ,1986-10 Occasional Paper ,1992 *Kennan Institute* ,2004 **The Impact of Defense Policy Options on the Dynamics of Soviet Economy** Michael Checinski,1985 Some Aspects of the Relationship of Dynamic Programming to the Calculus of Variations Stuart E. Dreyfus,1964 This short paper surveys three aspects of dynamic programming The first part concerns the salient features of the dynamic programming approach to a problem and relates the formalism to more classical techniques The second section discusses one area of current dynamic programming research the mathematical rigorization of the results and the extension of its domain of proven applicability The third part illustrates the geometric and intuitive attributes of the dynamic programming formalism by treating in what is hopefully a straightforward manner a situation that appears classically to be quite complex This brief survey does not emphasize what may well be the most important merit of dynamic programming its easy generalizations to allow the inclusion of the stochastic and adaptive considerations that characterize almost all realistic control problems Author
