In an attempt to cease from reducing the world and its emergent phenomena to linear modeling and analytic dissection Dynamic Systems Theories DST and Embodiment theories and methods aim at accounting for the complex dynamic and non linear phenomena that we constantly deal with in psychology For instance DST and Embodiment can enrich psychology s understanding of the communicative process both in clinical and non clinical settings In psychotherapy an important amount of research has shown that next to other ingredients the therapeutic relationship is the most important active factor contributing to psychotherapy outcome These findings give communication a central role in the psychotherapy process In the traditional view the underlying model of understanding psychotherapy processes is that of a number of

components summatively coming together enabling us to make a linear causal prediction Yet communication is inherently dynamic A shift to viewing the communication process in psychotherapy as a field dynamic phenomenon helps us to take into account nonlinear phenomena such as feedback processes within and between persons We thus propose an embodied enactive dynamic systems view as a new theoretical and methodological perspective that can more realistically capture what happens among and between two persons in psychotherapy This view reaches beyond the current narrow model of psychotherapy research DST and Embodied Enactive Approaches can offer solutions to the loss of non linear phenomena the complex dynamics of reality and the holistic level of analysis DST and Embodied Enactive Approaches have developed not in a single discipline but in a joined movement based on various fields such as physics biology robotics anthropology philosophy linguistics neuroscience and psychology and have only recently entered clinical theorizing The two new paradigms have already triggered a rethinking of the therapeutic exchange by recognizing the embodied nature of psychological and communicative phenomena Their integration opens up a promising scenario in the field of psychotherapy research developing new profoundly transdisciplinary theoretical concepts methodologies and standards of knowledge The notion of field dynamics enables us to account for the role of the communicational context in the regulation of intra psychological processes while at the same time avoiding the pitfalls of an ontologization of the hierarchy of systemic organization Moreover the new approach implements methodological strategies that can transcend the conventional opposition between idiographic and nomothetic sciences

**You Are Not in Control, Welcome to Karma as Entite [CTB Approach]** Edenilson Brandl, In this book we explore the intricate and often misunderstood concept of karma not as a force of cosmic justice but as an obsession that can dominate and control one s life For many karma is viewed as a moral compass a force guiding actions toward balance and righteousness However what happens when this belief turns into an unhealthy fixation dictating not only thoughts and actions but also distorting one s sense of self The idea of karma while seemingly empowering can become a double edged sword When misinterpreted it can lead individuals down a path of emotional manipulation where they perceive every hardship as punishment for past actions and every decision as a test of moral worth Such fixation can entrap individuals in cycles of guilt self doubt and obsessive fear overshadowing their ability to move forward and live freely This book aims to shed light on how the obsession with karma can become a form of psychological persecution often self inflicted and how it manipulates emotions relationships and personal choices Drawing on real life examples philosophical discussions and psychological analysis we will examine the impact of karma obsession on one s identity and mental well being The goal is to offer readers insights into how to break free from the chains of this obsession rediscover a balanced approach to karma and reclaim control over their lives This journey is not about dismissing the concept of karma but understanding how to engage with it in a healthy empowering way It s about recognizing the line between belief and obsession and finding peace within that balance
