International Relations and the Problem of Time Andrew R. Hom, 2020-05-26 What is time and how does it influence our knowledge of international politics For decades International Relations IR paid little explicit attention to time Recently this began to change as a range of scholars took an interest in the temporal dimensions of politics Yet IR still has not fully addressed the issue of why time matters in international politics nor has it reflected on its own use of time how temporal ideas affect the way we work to understand political phenomena Moreover IR remains beholden to two seemingly contradictory visions of time the time of the clock and a longstanding tradition treating time as a problem to be solved *International Relations and the Problem of Time*

develops a unique response to these interconnected puzzles It reconstructs IR s temporal imagination by developing an argument that all times from natural rhythms to individual temporal experience spring from social and practical timing activities or efforts to establish meaningful and useful relationships in complex and dynamic settings In IR s case across a surprisingly wide range of approaches scholars employ narrative timing techniques to make sense of confounding processes and events This innovative account of time provides a more systematic and rigorous explanation for time in international politics It also develops provocative insights about IR s own history its key methodological commitments supposedly timeless statistical methods historical institutions and the critical vanguard of time studies This book invites us to reimagine time and in so doing to significantly rethink the way we approach the analysis of international politics

Conger, 1989 [Dystopian Galaxies](#) Anne Elizabeth Winchell, 2018-06-05 DYSTOPIAN GALAXIES is a collection of twelve unrelated stories and poems that explore different visions of what the future might be like after humanity has expanded beyond Earth Although none of these stories take place in the same galaxy they share a theme of unchanging human nature and the dangers of refusing to adapt to a shifting world While several offer hope of change and reconciliation others warn against the drastic consequences of failing to learn from past mistakes Love family and hope are explored in a variety of worlds ranging from inhospitable

earths where people are crammed into cities of millions and the only hope comes from alien gold to a legendary mountain range whose unnatural stability is challenged by the forces of technology that threaten an avalanche From plagues that warp DNA to raids that threaten the lives of innocents the dystopian futures imagined in this collection will inspire and provoke
