The Factory Question and Industrial England, 1830-1860 Robert Gray, 2002-04-04 The Factory Question and Industrial England addresses the continuing controversy over industrialisation It investigates different perceptions of the factory system either as a threat or a promise and the contested meanings of waged work in industry Making use of a great variety of sources such as sermons medical treatises fictional and visual representations Robert Gray places the languages of debate in their cultural contexts paying particular attention to the shifting constructions of class and gender in the rhetoric of reform and the ambiguities and tensions inherent in protective legislation He then relates patterns of conflict over factory legislation to the features of specific industrial towns The combination of regional cultural and textual analysis makes this book a coherent and original contribution to the study of industrial Britain in the nineteenth century Principles of Labor Legislation John Rogers Commons, John Bertram Andrews, 1920 Select critical bibliography pages 465 488 **Law and Society in England 1750-1950** William Cornish, Stephen Banks, Charles Mitchell, Paul Mitchell, Rebecca Probert, 2019-10-31 Law and Society in England 1750 1950 is an indispensable text for those wishing to study English legal history and to understand the foundations of the modern British state In this new updated edition the authors explore the complex relationship between legal and social change They consider the ways in which those in power themselves imagined and initiated reform and the ways in which they were obliged to respond to demands for change from outside the legal and political classes What emerges is a lively and critical account of the evolution of modern rights and expectations and an engaging study of the formation of contemporary social administrative and legal institutions and ideas and the road that was travelled to create them The book is divided into eight chapters Institutions and Ideas Land Commerce and Industry Labour Relations The Family Poverty and Education Accidents and Crime This extensively referenced analysis of modern social and legal history will be invaluable to students and teachers of English law political science and social history Annual Report of the Chief State Factory Inspector of Illinois Illinois. Department of Factory Inspection, 1915 **Trouble at the Mill** Aditya Sarkar, 2018-01-03 The colonial administration passed a Factory Act in 1881 producing the first official definition of factory in modern Indian history as a workplace using steam power and regularly employing over 100 workers In 1891 the Act was amended factories were redefined as workplaces employing over 50 workers the upper age limit of legal protection was raised weekly holidays were established and women mill workers were brought within its ambit Sarkar analyses the two versions of the Act and reveals the tensions inherent within the project of protective labour regulation Combining legal and

social history he identifies an emergent factory question The cotton mill industry of Bombay long considered as one of the birthplaces of modern Indian capitalism is the principal focal point of his investigation Factory law though experienced as a minor official initiative connected with some of the most potent ideological debates of the age Trouble at the Mill explores a shifting set of themes and raises questions rarely thematized by labour historians the ideologies of factory reform the politics of factory commissions the routines of factory inspection and the earliest waves of strike action in the cotton textile industry in the last quarter of the nineteenth century The Early History of Factory Legislation in Massachusetts (from 1825 to the Passage of the Ten Hour Law in 1874).
