Early Herbals:

A Catalogue of Early Herbals Karl Becher (M.D.), Arnold Carl Kleb, 1925 **Early Modern Herbals and the Book Trade** Sarah Neville, 2022-01-06 Between 1525 and 1640 a remarkable phenomenon occurred in the world of print England saw the production of more than two dozen editions identified by their imprints or by contemporaries as herbals Sarah Neville explains how this genre grew from a series of tiny anonymous octavos to authoritative folio tomes with thousands of woodcuts and how these curious works quickly became valuable commodities within a competitive print marketplace Designed to serve readers across the social spectrum these rich material artifacts represented both a profitable investment for publishers and an opportunity for authors to establish their credibility as botanists Highlighting the shifting contingencies and regulations surrounding herbals and English printing during the sixteenth and early seventeenth century the book argues that the construction of scientific authority in Renaissance England was inextricably tied up with the circumstances governing print This title is also available as Open Access on Cambridge Core **A Catalogue of Early Herbals** Arnold C. Klebs, 1925 **Early English magic and medicine** Charles Joseph Singer, 1920 **The Voynich Manuscript** M. E. D'Imperio, 1978 In spite of all the papers that others have written about the manuscript there is no complete survey of all the approaches ideas background information and analytic studies that have accumulated over the nearly fifty five years since the manuscript was discovered by Wilfrid M Voynich in 1912 This report pulls together all the information the author could obtain from all the sources she has examined and to present it in an orderly fashion The resulting survey will provide a firm basis upon which other students may build their work whether they seek to decipher the text or simply to learn more about the problem **An Illustrated History of the Herbals** Frank J. Anderson, 1997 This book is a fascinating and beautifully illustrated history of herbal texts throughout the world from ancient cultures through the seventeenth century An herbal by definition is a book that is descriptive of plants and the term did not come into use until the sixteenth century The production of herbals is closely connected to the history of early printing and offers the finest examples of this art and craft However the earliest records of ancient Egypt Sumer and China all reflect a tradition of works of botanicals and their medicinal properties long before printing The author's survey begins with a work called De materia medica written in the first century which is extant and as the final authority on pharmacy for 1500 years is the most important herbal ever written The study of herbals offers a rich history of the culture and beliefs from the folklore and science of medieval and classical worlds **A Catalogue of Early Herbals Mostly from the Well-known Library of Dr. Karl Becher, with an Introduction by Dr. Arnold C. Klebs**, 1925 **A Chaplet of Herbs** Florence Hine, 1915* **Herbals, their origin and evolution** Agnes Robertson Arber, 1912 **Herbal Medicine and Botanical Medical Fads** Frank Hoffmann, Martin J Manning, 2014-06-11 Find all the information you need on herbs and spices in one place Herbal Medicine and Botanical Medical Fads is an A to Z reference book written in a straightforward style that's informative enough for library use but informal enough for general reading This

William Swan Sonnenschein, 1926 [The Old English Herbals](#) Eleanour Sinclair Rohde, 2015-05-31 The fairies have almost deserted us but perhaps they will one day come back to our gardens and teach us that there is something true though beyond what we can know in the old astrological lore of the close secret communion between stars and flowers Do not flowers seem to reflect in microscopic form those glorious flowers which deck the firmament of heaven In many flowers there is something so star like that almost unconsciously our minds connect them with the luminaries in the great expanse above us and from this it seems but a short step to the belief that there is between them a secret communion which is past our understanding

The Old English Herbals originally published in 1922 is a book about in the author's words that fascinating and somewhat neglected branch of garden literature the old English Herbals At the time it was written herb gardens were scarce though the author's influence and books contributed to the growth we see in both herb and vegetable gardening today Still of relevance and interest to modern gardeners the book includes descriptions of Anglo Saxon herbals early printed herbals herbals from the New World the history of the last great English herbalist John Parkinson and late seventeenth century herbals Offers a careful review of all the important herbals from the eighth to the seventeenth century Susan Wittig Albert China Bayles Book of Days 365 Celebrations of the Mystery Myth and Magic of Herbs From The World of Pecan Springs A careful and beautiful work on that curiously neglected branch of garden literature the old English Herbals It is all very fascinating Readers who already possess Miss Rohde's first book A Garden of Herbs will find here the same delicate perception for detail and the same charming enthusiasm that attracted them there We cannot close this inadequate review of a notable volume without a word of praise for the admirable exhaustive bibliographies The Bookman Volume 63 1922 [The Old English Herbals](#) Eleanour Sinclair Rohde, 1922 *H, Natural science.
