Differix Internal Medicine M. von Planta, B. Martina, G. Hartmann, 1998-09-04 The DIFFERIX series is designed to help doctors improve their diagnostic skills Each page is restricted to a separate subject or symptom which has been refined to its basic essentials The authors have assumed a previous knowledge of the medical history of each case together with the findings from a basic clinical examination These aspects are therefore excluded leaving the main problem to be described individually and the differential diagnosis to be formulated Two color interior design

Differential Diagnosis by Laboratory Medicine Vincent Marks, Thomas Cantor, Dusan Mesko, Rudolf Pullmann, Gabriela Nosalova, 2012-12-06 I have been asked to write a foreword to the next edition of the Vademecum of Clinical Biochemistry renamed to Differential Diagnosis by Laboratory Medicine The Editor in Chief Professor Dusan Mesko conceived the idea of the Vademecum during a very intensely in tellectually active period as a visiting Olga Havel Fellow from Slovak Republic at the Mayo Clinic in Rochester It was here during his study stay that much of the conceptual planning and detailed realization was being completed It was with much interest that I observed Professor Mesko in his effort and I know while here he has gained admiration of those who had the privilege of interacting with him When the first edition of the Vademecum appeared and we received the copy for the Mayo Library and for myself I was overcome with a genuine sense of joy In this era of rapid information and the need to access usable information book such as this cannot be but judged extremely useful It is my hope that this work which attests to the thoroughness of Professor Mesko's and his co-workers efforts will prove to be fruitful for the students quick reference for clinicians and house officers lightening of burdens particularly of on call nights and for the teaching staff as well to quickly access needed information With these sentiments we wish the authors and the book well and also hope that the potential widening circle of readers and users will benefit from the work presented
