

Stages of drying of moist solid

- a) The solid is uniformly wet
- b) The upper region is partly dry
- c) The upper region of the solid is dry

The resistance to moisture diffusion increases from (a) to (b) to (c) and the drying rate decreases

Vertical arrows indicate direction of diffusion.

Diffusion Processes During Drying Of Solids:

Diffusion Processes During Drying of Solids K. N. Shukla,1990 The monograph presents a detailed mathematical examination of the generalised laws of diffusion in capillary porous solids as applicable to particular geometric situations of interest in the technology of drying The novelty of the monograph is to present the result in dimensionless form under general type of boundary conditions Many important results are presented graphically The integral transform technique is used throughout the work and a host of useful information of the technique is included in the appendix Research scientists and practising engineers in the areas of applied mathematics materials and energy will find it a very useful monograph

Numerical Analysis of Heat and Mass Transfer in Porous Media J.M.P.Q. Delgado, Antonio Gilson Barbosa Lima, Marta Vázquez da Silva,2012-06-25 The purpose of Numerical Analysis of Heat and Mass Transfer in Porous Media is to provide a collection of recent contributions in the field of computational heat and mass transfer in porous media The main benefit of the book is that it discusses the majority of the topics related to numerical transport phenomenon in engineering including state of the art and applications and presents some of the most important theoretical and computational developments in porous media and transport phenomenon domain providing a self contained major reference that is appealing to both the scientists researchers and the engineers At the same time these topics encounter of a variety of scientific and engineering disciplines such as chemical civil agricultural mechanical engineering etc The book is divided in several chapters that intend to be a resume of the current state of knowledge for benefit of professional colleagues

Mathematical Modeling of Food Processing Mohammed M. Farid,2010-05-21 Written by international experts from industry research centers and academia Mathematical Modeling of Food Processing discusses the physical and mathematical analysis of transport phenomena associated with food processing The models presented describe many of the important physical and biological transformations that occur in food during proces

Contribution from the Department of

Chemical Engineering Massachusetts Institute of Technology. Dept. of Chemical Engineering,1928 *Ceramic Processing and Sintering* Mohamed N. Rahaman,2003-07-31 As the field s premiere source this reference is extensively revised and expanded to collect hard to find applications equations derivations and examples illustrating the latest developments in ceramic processing technology This book is concerned primarily with the processing of polycrystalline ceramics and focuses on the widespread fabrication of ceramics by the firing of consolidated powders forms A brief treatment of sol gel processing is also included Ceramic Processing and Sintering Second Edition provides clear and intensive discussions on colloidal and sol gel processing sintering of ceramics and kinetic processes in materials From powder synthesis and consolidation to sintering and densification behavior this latest edition emphasizes the impact of each processing procedure on ceramic properties The second edition also contains new and extended discussions on colloid stability polymer growth and gelation additives in ceramic forming diffusion and defect strucutre normal and abnormal grain growth microwave sintering Rayleigh instability effects and Ostwald ripening Illustrating the interconnectedness between the various steps in the overall fabrication route Ceramic Processing and Sintering Second Edition approaches the fundamental issues of each process and show how they are applied to the practical fabrication of ceramics Concepts of Small-scale Food Processing Donald G. Mercer,2021-02-08 Providing detailed information on key areas of post harvest technologies this book is written with small scale processors and entrepreneurs in food processing who have no formal training in Food Science or Food Engineering in mind Uniquely it will review the hands on aspects of food processing from a largely non academic viewpoint It is written in non technical language and covers everything from the basic science of why food is processed to a description of the main methods used Coverage includes all current technologies that are used at the small scale such as why food is processed the historical development of food processing background skills heating and cooling in food processing thermal processing basics and specialised calculations drying food materials statistical manufacturing control and sugar solution calculations in beverage making The target audience for this book is vastly under served with appropriate information and the abundant use of photographs showing the various concepts described in the text makes this book appealing to those required to understand their food process operations **Technical Bulletin** British Paper and Board Makers' Association.
