The Future Belongs to the Digital Engineer Dutch Holland, Jim Crompton, 2013-12-30 The Future Belongs to the Digital Engineer By Dutch Holland and Jim Crompton The Digital Engineer will be a person with knowledge and skill in the use of engineering and digital technology to enable major process improvements and performance increases in both physical and business operations New engineers today enter the workforce with high digital literacy in addition to their qualifications in traditional disciplines The challenge is to turn new professionals into Digital Engineers who bring value to the business Jim Crompton with his coauthor Dutch Holland has clearly shown us how to bring historically disconnected skills organizations and technologies together to drive competitive advantage This book needs to be on every upstream business persons digital bookshelf Peter J Robertson former Vice Chairman of the Board Chevron Corporation [Emerging Trends in Systems Engineering Leadership](#) Alice F. Squires, Marilee J. Wheaton, Heather J. Feli, 2022-11-06 This book celebrates the efforts of women in the international systems engineering community While there are dozens of books that tackle the topic of systems engineering and thousands of books that address leadership this book is unique Emerging Trends in Systems Engineering Leadership Practical Research from Women Leaders presents personal well researched hands on perspectives of emerging trends in systems engineering leadership from industry government and academia covering timely topics applicable across many domains all under one cover This book presents material for engineers scientists technologists and others to help them tackle challenges in their everyday work dealing with complex socio technical systems The book provides guidance for leaders on shoring up essential soft skills to address the increasing demand for professional competencies addresses diversity equity inclusion and empowering women in the workforce discusses broader facets of systems engineering leadership including systems thinking ethics and utilitarianism and investigates the impact of emerging technological change on systems resilience and the digital enterprise This book provides a multi perspective approach for leaders to navigate a changing world and develop and deliver optimal system solutions to global societal challenges that meet human needs To this end the authors extend beyond the solid technical base to encompass the human aspect of system behavior This book is written by twenty six female authors three of whom also serve as the editors from around the world at varying career stages who share their research achievements perspectives and successes in emerging areas of systems engineering leadership Testimonials As the systems that modern society depends on get more complicated and complex we are in the midst of a renaissance with regard to research relating to systems engineering and science A vast majority of this research is focused on the development of a modern toolkit for systems engineers today and into the future This takes the form of new and improved methods models methodology processes and tools This research is critical but likely insufficient without a focus on the most valuable resource with regard to systems engineering within any organization the human resource Therein lies the focus of this textbook It addresses systems engineering leadership from a variety of perspectives while also addressing broad

aspects relating to mentoring and the necessary evolving competencies that we need to address in today's workforce. This emphasis makes this book unique. The icing on the cake is that all the chapters in this textbook are written by contemporary women leaders; this provides a necessary and unique perspective on the topic of leadership that is long overdue. I highly recommend this textbook to all my colleagues in academia, industry, and government.

Dinesh Verma, Ph.D., Professor, Systems Engineering School of Systems and Enterprises, Executive Director, Systems Engineering Research Center (SERC), Stevens Institute of Technology, Hoboken, NJ 07030.

The past decade has seen a dramatic increase in the number of women who are formally recognized in systems engineering, technical management, and leadership positions in all sectors. With industry, academia, professional systems engineering societies, and publishers enabling and illuminating the growing and substantial contributions of women in engineering, women have unprecedented opportunities today to contribute to systems engineering in both leadership and management positions. This volume, a compendium of chapters written by enterprising international women leaders at various stages in their career, addresses diverse topics such as leadership, management, empowerment, equity, diversity, inclusion, and mentoring. It is a valuable resource for engineering management courses in academia, systems engineering leadership training in industry, and Diversity, Equity, and Inclusion program development by Human Resource departments in industry, academia, and government.

Design Thinking Research Christoph Meinel, Larry Leifer, 2022-09-07. Extensive research conducted by the Hasso Plattner Design Thinking Research Program at Stanford University in Palo Alto, California, USA, and the Hasso Plattner Institute in Potsdam, Germany, has yielded valuable insights on why and how design thinking works. The participating researchers have identified metrics, developed models, and conducted studies which are featured in this book and in the previous volumes of this series. This volume provides readers with tools to bridge the gap between research and practice in design thinking with varied real-world examples. Several different approaches to design thinking are presented in this volume. Acquired frameworks are leveraged to understand design thinking team dynamics. The contributing authors lead the reader through new approaches and application fields and show that design thinking can tap the potential of digital technologies in a human-centered way. It also presents new ideas in neurodesign from Stanford University and the Hasso Plattner Institute in Potsdam, inviting the reader to consider newly developed methods and how these insights can be applied to different domains. Design thinking can be learned. It has a methodology that can be observed across multiple settings, and accordingly, the reader can adopt new frameworks to modify and update existing practice. The research outcomes compiled in this book are intended to inform and provide inspiration for all those seeking to drive innovation, be they experienced design thinkers or newcomers.
