

## EA\_Gatekeeper 2200 Model Line

Ultimate flexibility, reliability & performance

The EA\_Gatekeeper provides distributed intelligence throughout the EnergyAxis AMI network. It transmits schedules, collects meter data, manages firmware updates, and enforces communication priorities as well as establishing secure and robust communication paths—even during outages. All EA\_Gatekeepers use the standard Honeywell gatekeeper electronics module to provide data collection and communication on the EnergyAxis mesh network.

Utilities can select the gatekeeper style and options that meet the requirements for their geographies and their communications infrastructure. See the product guide (PG42-1023) and the data sheet (EMT-DS-NAEN-001003) for more information on the role gatekeepers play in the network as well as information on the meter-based EA\_Gatekeeper.

The various gatekeeper components are assembled and protected in a NEMA enclosure. Like the meter-based gatekeeper, the core of a gatekeeper 2200 model line is the Honeywell gatekeeper electronics module. Unlike the meter-based gatekeeper, the gatekeeper 2200 model line also includes a back-up battery, surge protection, significantly more mounting and powering options, as well as support for a wide range of additional WAN choices.

### **WAN flexibility**

Honeywell's EA\_Gatekeeper enables utilities to change the wide area network (WAN) media across the entire system or at a single point. The change-out requires minimal service effort by the utility in the field, saving the cost and time of returning the gatekeeper to the manufacturer for reconfiguration. This also simplifies purchasing and inventory tracking, and allows the utility to adapt its WAN communications to take advantage of future technology development and price reductions.

The product is designed to support the most commonly used 3rd party WAN communications options<sup>1</sup> and the enclosure is sized with a physical space designed to accommodate the majority of popular WAN hardware. See Model 2200 gatekeeper questionnaire for more information.

### **Mounting & powering flexibility**

The 2200 model line gatekeepers are designed for easy mounting at a variety of locations such as a transformer, pole, tower, or building. Gatekeepers can be used in gas or water only service areas as well as electricity and combined electricity, water and/or gas service areas. Each gatekeeper comes with universal mounting hardware that enables the gatekeeper to be installed on a utility pole, tower, or structure.

An input voltage range of 120 VAC to 277 VAC provides flexibility for powering the device, particularly on street light installations.

Superior performance, robust design, and multiple deployment options coupled with exceptional communications flexibility make the EA\_Gatekeeper 2200 model line the best choice in advanced smart-grid and smart-meter communications for utilities.

Highly configurable
