JUNE

Marine Fuel Injection is an adaptation of automotive EFI systems. The concept of EFI has been around for a long time. Electronic Fuel Injection is bringing a new level of performance and enjoyment to the boating world.

In Years past, Volvo Penta engines were equipped with 2 types of EFI systems, Throttle Body Injection (TBI) and Multipoint Injection (MPI or PFI). Both systems use the same types of sensors and a similar ECM (Electronic Control Module). This course is designed to cover Speed Density Fuel Injection used on all Volvo Penta fuel injected engines through the O2 model year.

Minimum performance requirements for successful completion of this course are:

1. Class exit and final final average score of 80% or higher
2. End of class reorganization of tools and equipment, as directed
3. 100% class attendance
