Handbook of Sociological Theory Jonathan H. Turner,2006-05-17 Sociology is experiencing what can only be described as hyperdifferentiation of theories there are now many approaches competing for attention in the intellectual arena From this perspective we should see a weeding out of theories to a small number but this is not likely to occur because each of the many theoretical perspectives has a resource base of adherents As a result theories in sociology do not compete head on with each other as much as they coexist This seminal reference work was brought together with an eye to capturing the diversity of theoretical activity in sociology specifically the forefront of theory Contributors describe what they themselves are doing right now rather than what others have done in the past The goal of this volume is to allow prominent theorists working in a variety of traditions who wouldn't usually come together to review their work The chapters in this volume represent a mix of theoretical orientations and strategies but these theories are diverse and represent the prominent theoretical discussions in sociology today Some areas included are Section I Theoretical Methodologies and Strategies Section II The Cultural Turn in Sociological Theorizing Section III Theorizing Interaction Processes Section IV Theorizing from the Systemic and Macrolevel Section V New Directions in Evolutionary Theorizing Section VI Theorizing on Power Conflict and Change Section VII Theorizing from Assumptions of Rationality This handbook will be of interest to those wanting a broad spectrum and overview of late 20th early 21st century sociological theory [Handbook of Social Theory](#) George Ritzer,Barry Smart,2001-01-02 This book is an indispensable resource for anyone interested in the roots current debates and future development of social theory It draws together a team of outstanding international scholars and presents an authoritative and panoramic critical survey of the field The volume is divided into three parts The first part examines the classical tradition Included here are critical discussions of Comte Spencer Marx Durkheim Weber Simmel Mead Freud Mannheim and classical feminist thought This part conveys the classical tradition as a living resource in social theory it demonstrates not only the critical significance of classical writings but their continuing relevance The second part moves on to examine the terrain of contemporary social theory The contributions discuss the significance and strengths and weaknesses of structural functionalism recent Marxian theory critical theory symbolic interactionism phenomenology ethnomethodology exchange theory rational choice contemporary feminism multiculturalism postmodernism the thought of Foucault and Habermas and figurational sociology The reader gains a comprehensive and informed picture of the key issues
