

CONNECTOR INSPECTION SERVICE POINTS

VISUAL INSPECTION

Disconnected or loose wires

Inspect and correct a loose wire

Connector is disconnected or improperly connected

- Connector pins are pulled out
- Gap is between wires or terminal wires

- Low contact pressure between male and female terminals
- Low contact pressure due to loose terminals or foreign matter lodged in terminals

CONNECTOR PIN INSPECTION

If the connector pin shape is damaged, the terminal connections (male and female pins) will not be perfect. If the connector body is scratched and the pins may pull out of the female side of the connector. Therefore, gently pull the harness out by one to make sure that no pins pull out of the connector.

CONNECTOR ENGAGEMENT INSPECTION

Use special test inspection system (SDS1171), connector pin connection pressure inspection for ease of the inspection harness and to inspect the engagement of the male pins and female pins. (It's doing time: 1 to 2 min)

INSPECTION SERVICE POINTS FOR A BLOWN FUSE

CAUTION

A diagnostic code may be stored due to a blown fuse.

Remove the blown fuse and measure the resistance between the load side of the blown fuse and the earth. Check the switches of all circuits which are connected to this fuse. If the resistance is almost 0Ω at the time, there is a short somewhere between those switches and the load. If the resistance is not 0 Ω, there is no short at the present time, but a component short has probably caused the fuse to blow. The main causes of a short circuit are the following:

- Harness being damaged by the vehicle body
- Damage to the outer casing of the harness due to wear or heat
- Water getting into the connector or circuitry
- Normal and progressively starting a circuit, etc.)

HOW TO COPE WITH INTERMITTENT MALFUNCTIONS

Intermittent malfunctions often occur under certain conditions, and if these conditions can be ascertained, determining the cause becomes simple. In order to ascertain the conditions under which an intermittent malfunction occurs, first ask the customer for details about the driving conditions, weather conditions, frequency of occurrence and trouble symptoms, and then try to recreate the trouble symptoms. Next, identify whether the reason why the trouble symptom occurred under these conditions is due to climate, temperature or some other factor. If climate is thought to be the cause, carry out the following checks with the connectors and components to confirm whether the trouble symptom occurs. The checks to be checked are connectors and components which are indicated by inspection procedures or given as probable causes (what gets worse diagnostic code is trouble symptoms).
