Barbri Bar Review BAR/BRI (Firm),2007 Barbri Bar Review ,2008 Simulated MBE Workshop , Barbri Bar Review ,2008 Simulated MBE Workshop ,2006 Measuring What Matters Most Daniel L. Schwartz,Dylan Arena,2013 An argument that choice based process oriented educational assessments are more effective than static assessments of fact retrieval If a fundamental goal of education is to prepare students to act independently in the world in other words to make good choices an ideal educational assessment would measure how well we are preparing students to do so Current assessments however focus almost exclusively on how much knowledge students have accrued and can retrieve In Measuring What Matters Most Daniel Schwartz and Dylan Arena argue that choice should be the interpretive framework within which learning assessments are organized Digital technologies they suggest make this possible interactive assessments can evaluate students in a context of choosing whether what how and when to learn Schwartz and Arena view choice not as an instructional ingredient to improve learning but as the outcome of learning Because assessments shape public perception about what is useful and valued in education choice based assessments would provide a powerful lever in this reorientation in how people think about learning Schwartz and Arena consider both theoretical and practical matters They provide an anchoring example of a computerized choice based assessment argue that knowledge based assessments are a mismatch for our educational aims offer concrete examples of choice based assessments that reveal what knowledge based assessments cannot and analyze the practice of designing assessments Because high variability leads to innovation they suggest democratizing assessment design to generate as many instances as possible Finally they consider the most difficult aspect of assessment fairness Choice based assessments they argue shed helpful light on fairness considerations
