Barbuda Reconnaissance:

Black Ranching Frontiers Andrew Sluyter, 2012-10-30 DIV In this groundbreaking book Andrew Sluyter demonstrates for the first time that Africans played significant creative roles in establishing open range cattle ranching in the Americas In so doing he provides a new way of looking at and studying the history of land labor property and commerce in the Atlantic world div DIV Sluyter shows that Africans ideas and creativity helped to establish a production system so fundamental to the environmental and social relations of the American colonies that the consequences persist to the present He examines various methods of cattle production compares these methods to those used in Europe and the Americas and traces the networks of actors that linked that Atlantic world The use of archival documents material culture items and ecological relationships between landscape elements make this book a methodologically and substantively original contribution to Atlantic African American and agricultural history div **Technical Series Bulletin** United States.
