**Exchange in Early Modern Tuscany and Eurasia** Francesco Freddolini, Marco Musillo, 2020-06-09 This book explores how the Medici Grand Dukes pursued ways to expand their political commercial and cultural networks beyond Europe cultivating complex relations with the Ottoman Empire and other Islamicate regions and looking further east to India China and Japan The chapters in this volume discuss how casting a global cross cultural net was part and parcel of the Medicean political vision Diplomatic gifts items of commercial exchange objects looted at war maritime connections and political plots were an inherent part of how the Medici projected their state on the global arena The eleven chapters of this volume demonstrate that the mobility of objects people and knowledge that generated the global interactions analyzed here was not unidirectional rather it went both to and from Tuscany In addition by exploring evidence of objects produced in Tuscany for Asian markets this book reveals hitherto neglected histories of how Western cultures projected themselves eastwards **The Matter of**

**Mimesis**, 2023-03-13 Mimesis or imitation comes in many forms from animal and plant mimicry to artistic copies from life This book offers eighteen essays addressing mimesis from diverse perspectives From the recreation of galaxies to Iron Age torcs from counterfeit dragons to modern waxworks each chapter explores facets of material mimesis from prehistory to the present day The Matter of Mimesis invites readers to compare practices of imitating faking and synthesising materials and objects in nature art and science raising questions about skills techniques and politics of making that transcend historical and disciplinary boundaries and inform both our past and future worlds *Nobility and Business in History* Silvia A. Conca

Messina, Takeshi Abe, 2023-03-31 This book reconsiders the role of nobility as influential economic players and provides new insights into the business activities of noblemen in Europe and Asia during the nineteenth century thus offering up opportunities for comparison in an age of economic expansion and globalisation What was the contribution of the nobility to the economy Can we consider noblemen to have been endowed with an entrepreneurial spirit Research shows that far from being passive throughout the century the European nobility were widely involved in business carried on innovations refined management strategies and diversified their investments from agriculture to transport industry and finance Both in Europe and Asia businesses were embedded in social networks and personal relationships In modern Japan after the Meiji Restoration the unique case in Asia where a Western style nobility was created business trust personal connections and aristocratic marriages were intertwined and Japanese noblemen especially the richer ones acted as promoters of industrialisation even though their role was certainly limited in time and space This volume will be of great interest to scholars and researchers in the fields of economics management political science sociology public management and history The chapters in this book were originally published as a special issue of Business History **Shapely Bodies** Christine A.

Jones, 2013-05-16 *Shapely Bodies The Image of Porcelain in Eighteenth Century France* constructs the first cultural history of porcelain making in France It takes its title from two types of bodies treated in this study the craft of porcelain making shaped clods of earth into a clay body to produce high end commodities and the French elite shaped human bodies into social subjects with the help of makeup stylish patterns and accessories These practices crossed paths in the work of artisans whose luxury objects reflected and also influenced the curves of fashion in the eighteenth century French artisans began trials to reproduce fine Chinese porcelain in the 1660s The challenge proved impossible until they found an essential ingredient kaolin in French soil in the 1760s *Shapely Bodies* differs from other studies of French porcelain in that it does not begin in the 1760s at the Sèvres manufactory when it became technically possible to produce fine porcelain in France but instead ends there Without the secret of Chinese porcelain artisans in France turned to radical forms of experimentation Over the first half of the eighteenth century they invented artificial alternatives to Chinese porcelain decorated them with French style and with equal determination shaped an identity for their new trade that distanced it from traditional guild crafts and aligned it with scientific invention The back story of porcelain making before kaolin provides a fascinating glimpse into the world of artisanal innovation and cultural mythmaking To write artificial porcelain into a history of real porcelain dominated by China Japan and Meissen in Saxony French porcelainiers learned to describe their new commodity in language that tapped into national pride and the mythic power of French savoir faire Artificial porcelain cut such a fashionable image that by the mid eighteenth century Louis XV appropriated it for the glory of the crown When the monarchy ended revolutionaries reclaimed French porcelain the fruit of a century of artisanal labor for the Republic Tracking how the porcelain arts were depicted in documents and visual arts during one hundred years of experimentation *Shapely Bodies* reveals the politics behind the making of French porcelain's image Published by University of Delaware Press Distributed worldwide by Rutgers University Press
