Adenocarcinoma of the Esophagogastric Junction Simone Giacomuzzi, Andrea Zanoni, Giovanni de Manzoni, 2017-02-23. This book offers up to date and comprehensive coverage of the diagnosis and therapy of adenocarcinoma of the esophagogastric junction (EGJ). As is appropriate in the era of multidisciplinary and multimodal treatment, the contributions of all the various specialists involved cooperatively in the treatment of EGJ cancer are thoroughly described. Detailed attention is also paid to the significance of preneoplastic lesions such as Barrett's esophagus. The final part of the book represents a surgical atlas documenting the techniques used in the EGJ region with superb color images and stepwise description of procedures. Against the background of the rapidly increasing incidence in EGJ cancer, especially evident in Western countries, there is a need for greater uniformity in management strategies which currently vary significantly across the world. This book provides appropriate guidance that will assist all practitioners involved in the diagnosis and treatment of EGJ cancers including surgeons, oncologists and radiotherapists. *Barrett's Esophagus* J. R. Green, J. R. Green, M. James Kirkland, 2011-12-21. Barrett's esophagus is a condition where stomach acid damages the esophageal lining, the lining of the tube that leads from the throat towards the stomach. The lining is changed to a lining similar to that of the distal parts of the gastrointestinal tract. A small percentage of Barrett's esophagus patients develop a rare but usually fatal cancer of the esophagus, esophageal adenocarcinoma. Barrett's esophagus is treatable. This concise book outlines the causes, tests and available treatment options for this devastating disease.
