Barry Byrne - John Lloyd Wright Sally Kitt Chappell, Ann van Zanten, 1982 BARRY BYRNE, JOHN LLOYD WRIGHT-ARCHITECTURE AND DESIGN., 1982 **Barry Byrne** Sally Kitt Chappell, 1982 The Oak Park Studio of Frank Lloyd Wright Lisa D. Schrenk, 2021-04-05 Between 1898 and 1909 Frank Lloyd Wright's residential studio in the idyllic Chicago suburb of Oak Park served as a nontraditional work setting as he matured into a leader in his field and formulated his iconic design ideology Here architectural historian Lisa D Schrenk breaks the myth of Wright as the lone genius and reveals new insights into his early career With a rich narrative voice and meticulous detail Schrenk tracks the practice's evolution addressing how the studio fit into the Chicago area design scene identifying other architects working there and their contributions and exploring how the suburban setting and the nearby presence of Wright's family influenced office life Built as an addition to his 1889 shingle style home Wright's studio was a core site for the ideological development of the prairie house one of the first truly American forms of residential architecture Schrenk documents the educational atmosphere of Wright's office in the context of his developing design ideology revealing three phases as he transitioned from colleague to leader This heavily illustrated book includes a detailed discussion of the physical changes Wright made to the building and how they informed his architectural thinking and educational practices Schrenk also addresses the later transformations of the building including into an art center in the 1930s its restoration in the 1970s and 80s and its current use as a historic house museum Based on significant original and archival research including interviews with Wright's family and others involved in the studio and 180 images *The Oak Park Studio of Frank Lloyd Wright* offers the first comprehensive look at the early independent office of one of the world's most influential architects *Ireland & the New Architecture* Sean Rothery, 1989-01-01 Architecture like print is ubiquitous a part of the fabric of culture which touches every aspect of our lives while reflecting and articulating socio economic change As the twentieth century draws to a close the architecture inscribed in its early decades attracts ever closer scrutiny The design movements in fin de siècle Europe saw manifestations of modernism combine with unprecedented advances in technology and American machine culture emerging in a new architecture Viennese Rationalism supplanted free form Art Nouveau Beaux Arts gave way to Le Corbusier's bizarre brick Expressionism of the Amsterdam School coexisted with De Stijl's bare abstractions Modern architecture in the form of the International Style of Gropius and the Bauhaus reached its apogee in the early 1930s but styles scorned by this orthodoxy Art Deco and stripped Classicism flourished alongside it and are now being reappraised *Ireland and the New Architecture 1900-1940* is the first comprehensive study of its subject It describes the pioneering buildings of the period and examines their intellectual scaffolding and the influence of international design movements demonstrating that Ireland was no architectural backwater as is often assumed It looks in detail at the writings and examples of early modernism and the way in which architects of a fledgling Free State went beyond Britain to France Holland Scandinavia Austria Germany and America for

models of new structures in both private and public spheres of building A generous selection of over two hundred drawings and photographs along with extended interview material with survivors from the time give this book unique value It is both a stimulating work of reference and a survey guide to Ireland s position in and contribution to the mainstream of modern architecture
