Autobiographical Memory Charles P. Thompson,Douglas J. Herrmann,Darryl Bruce,J. Don Read,David G. Payne,2014-10-10 The organization of the first Society for Applied Research in Memory and Cognition SARMAC conference centered around two specifically identifiable research topics autobiographical memory and eyewitness memory These two areas long time staples on the menu of investigators of memory in more natural settings differ on a variety of dimensions perhaps most notably in their specific goals for scientific inquiry and application For many questions about memory and cognition that are of interest to scientific psychology there have been historical as well as rather arbitrary reasons for their assignment to the autobiographical or eyewitness memory fields Perhaps as a result of differing historical orientations the first volume s seven autobiographical memory chapters focus upon the qualities or types

of recall from research participants whereas the seven chapters in the eyewitness memory volume generally focus upon the quantity a concern for completeness and accuracy of recall This interest in the ultimate end product and its application within the legal process in general encourages eyewitness memory investigators to modify their testing procedures continually in an attempt to gain even more information from participants about an event Indeed several of the eyewitness memory chapters reflect such attempts Beyond the specific contributions of each chapter to the literature on autobiographical and eyewitness memory the editors hope that the reader will come away with some general observations the autobiographical and eyewitness memory fields are thriving these two fields are likely to remain center stage in the further investigation of memory in natural contexts although the autobiographical and eyewitness memory chapters have been segregated in these two volumes the separation is often more arbitrary than real and connections between the two areas abound the two research traditions are entirely mindful of fundamental laboratory methods research and theory sometimes drawing their research inspirations from that quarter and the two fields though driven largely by everyday memory concerns can contribute to a more basic understanding of memory at both an empirical and a theoretical level

Memory Distortions and Their Prevention Deborah L. Best, Margaret J. Intons-Peterson, 2013-05-13 This volume explores the well documented phenomena of memory distortion in a variety of settings as well as how it can be ameliorated or prevented altogether The editors have recruited some of the very best researchers in the applied cognitive field to address these issues These authors examine distortion from several angles fuzzy trace theory face identification memory deficits with age collaborative influences on distortion sociocultural influences on memory retention of procedural and declarative information and ignorance of medical and other

information The final chapter addresses the issue of cognitive technology in general Because of the surge of interest in applied cognitive psychology and in the memory distortion issue in particular this book will be valuable to many applied and basic researchers
