## **Barnards Planet:**

*Planet Quest* Ken Crowell, 1999 Are we alone In 1995 planet hunters discovered the first alien solar system around a star like our own Sun Ken Crowell tells the fascinating story of this discovery and the people who made it then explores the possibility that one day we may have the technology to travel to different solar systems and find life

**Memoirs of Frederick A.P. Barnard** John Fulton, 1896 **Astronomy, by W. Kaempffert; introduction by E.E. Barnard** Francis Rolt-Wheeler, 1909 Planets & Perception William Sheehan, 1988-11 Do we really know what we see through a telescope How does the ocular system construct planetary images and how does the brain interpret them Drawing on both astronomical and psychological data William Sheehan now offers the first systematic analysis of the perceptual and cognitive factors that go into the initial structuring of a planetary image and its subsequent elaboration Sheehan details the development of lunar and planetary astronomy beginning with Galileo's study of the moon and focuses particularly on the discover of canals on Mars Through each episode he underscores a perceptual or psychological theme such as the importance of differences in vision tachistoscopic perceptual effects the influence of expectation and suggestion on what one sees and the social psychology of scientific discovery *Planets and Perception* is a provocative book that will intrigue anyone who has ever looked through a telescope In addition it offers the psychologically oriented reader a case history in the processes of perception unlike any other in the literature

**Nature** Sir Norman Lockyer, 1889 **Religions and Extraterrestrial Life** David A. Weintraub, 2014-07-16 In the twenty first century the debate about life on other worlds is quickly changing from the realm of speculation to the domain of hard science Within a few years as a consequence of the rapid discovery by astronomers of planets around other stars astronomers very likely will have discovered clear evidence of life beyond the Earth Such a discovery of extraterrestrial life will change everything Knowing the answer as to whether humanity has company in the universe will trigger one of the greatest intellectual revolutions in history not the least of which will be a challenge for at least some terrestrial religions Which religions will handle the discovery of extraterrestrial life with ease and which will struggle to assimilate this new knowledge about our place in the universe Some religions as currently practiced appear to only be viable on Earth Other religions could be practiced on distant worlds but nevertheless identify both Earth as a place and humankind as a species of singular spiritual religious importance while some religions could be practiced equally well anywhere in the universe by any sentient beings Weintraub guides readers on an invigorating tour of the world's most widely practiced religions It reveals what if anything each religion has to say about the possibility that extraterrestrial life exists and how or if a particular religion would work on other planets in distant parts of the universe
