Baseball From The Ground Up:

From the Ground Up Alison Sant, 2022-01-11 For decades American cities have experimented with ways to remake themselves in response to climate change. These efforts, often driven by grassroots activism, offer valuable lessons for transforming the places we live in. *From the Ground Up: Local Efforts to Create Resilient Cities* design expert Alison Sant focuses on the unique ways in which US cities are working to mitigate and adapt to climate change while creating equitable and livable communities. She shows how from the ground up we are raising the bar to make cities places in which we don't just survive but where all people have the opportunity to thrive. The efforts discussed in the book demonstrate how urban experimentation and community-based development are informing long-term solutions. Sant shows how US cities are reclaiming their streets from cars, restoring watersheds, growing forests, and adapting shorelines to improve people's lives while addressing our changing climate. The best examples of this work bring together the energy of community activists, the organization of advocacy groups, the power of city government, and the reach of federal environmental policy. Sant presents 12 case studies drawn from research and over 90 interviews with people who are working in these communities to make a difference. For example, advocacy groups in Washington DC are expanding the urban tree canopy and offering job training in the growing sector of urban forestry. In New York, transit agencies are working to make streets safer for cyclists and pedestrians while shortening commutes. In San Francisco, community activists are creating shoreline parks while addressing historic environmental injustice. *From the Ground Up* is a call to action. When we make the places we live more climate resilient, we need to acknowledge and address the history of social and racial injustice. Advocates, non-profit organizations, community-based groups, and government officials will find examples of how to build alliances to support and embolden this vision together. Together we can build cities that will be resilient to the challenges ahead. **Aviation from the Ground Up** Gardener Burnell Manly, 1942 [Reading The Waste Land from the Bottom Up](#) A. Booth, 2015-05-06 A guidebook to the allusions of T.S. Eliot's notorious poem *The Waste Land*. *Reading The Waste Land from the Bottom Up* utilizes the footnotes as a starting point, opening up the poem in unexpected ways. Organized according to Eliot's line numbers and designed for both scholars and students, chapters are free-standing and can be read in any order. **Association Men**, 1922 *Baseball's Most Outrageous Promotions* Joseph Naticchio, 2026-01-07 In major league baseball, the period between 1946 and the early 1980s represented the Era of the Barnums, when certain inspired owners and executives raised to an art form the use of promotions to increase attendance. This book highlights thirteen of the most outlandish such stunts in major league history. These promotions go far beyond giveaways of Hawaiian shirts or unique bobbleheads. They involved a battle with weapons between baseball players and fans, children running willy-nilly around a baseball field, naked fans running the bases, drunken fans trashing baseball fields, fans dismantling a stadium while a game was ongoing, fans managing a game from the stands, women parading in wet T-shirts, mass weddings, the Beatles playing to a half-empty stadium, a mule mascot treated better

than players and an explosion on a baseball field large enough to create a crater Even wilder promotions are covered in impressive detail in this unique study of major league history Metaphor from the Ground Up Daniel C. Strack,2019-02-20 Metaphor from the Ground Up introduces Conceptual Filtering Theory a theory of mental processing that describes figurative language communication in terms of conceptual domain projection and contextual disambiguation In an attempt to match theoretical observations from cognitive semantics and pragmatics with related knowledge about mental processes from cognitive neuroscience CFT first examines the distributed nature of conceptualization and then uses this background information to explain metonymic binding and metaphoric mapping Once the perceptual origins of metonymy and metaphor have been demonstrated CFT offers a detailed account of how salient aspects of conceptualization differentially combine to achieve predictable inferencing results in linguistic communication In addition CFT characterizes the role of contextual effects in pruning salient inferencing options and demonstrates how situational frames can be manipulated to guide semantic outcomes The book as a whole will assert that figurative language processing cannot be characterized in terms of a generically constituted base system that receives inputs and spits out predictable results according to logical probability in a situational vacuum Rather it is a dynamic context sensitive process that continually reweights the underlying system so as to rapidly select situation relevant lines of inferencing from among a variety of salient inferencing options *Lefty O' the Big League* Burt L.
