Learning Or Working With You Whatever Is Best For Your Child The lessons are laid out in a fashion that allows your child to work independently as much as possible You generally need to spend a few minutes with your child prior to any independent work in order to set the stage for the day s learning Depending on your child s age and ability to work independently you may feel most comfortable working through the entire lesson each day with your child I have found with my own kids that on some days they really want to work by themselves and on others they really want to do the lesson together This curriculum is designed to handle both scenarios and allows you to be completely flexible The Doodles Do Algebra series includes the algebra topics encountered in modern day Algebra I and Algebra II as well as topics that are no longer covered until college such as calculating the square root of large numbers without a calculator or a computer The curriculum is based on the teaching methodology of algebra texts written in the late 1600 s to the early 1800 s and used by English and American children *Handbook of the new Code of regulations, 1880, and other official instructions, orders, and circulars of the Education department, with notes, &c* John F.
