When multiple forces act on an object, they combine to determine the net force, which determines whether the object speeds up, slows down, or changes direction. Understanding how forces act together is essential to explaining various phenomena, from a ball being kicked to a rocket launching into space.</p> <p>Newton's second law of motion states that the acceleration of an object is directly proportional to the net force acting on it and inversely proportional to its mass. This means that if the net force increases, the acceleration increases proportionally, but if the mass also increases, the acceleration will decrease. For example, pushing a heavy box with a small force will result in a small acceleration, while pushing a lighter box with the same force will result in a larger acceleration.</p> <p>Force is also related to the concept of momentum, which is the product of an object's mass and velocity. When a net force acts on an object, it changes the object's momentum. The rate of change of momentum is equal to the net force acting on the object. This means that a larger net force will cause a greater change in momentum over a shorter period of time.</p> </div> <p>Answer the questions that follow.</p> <ol style="list-style-type: none"> <li>Which of the following is NOT a type of force?             <ol style="list-style-type: none"> <li>Gravitational force</li> <li>Normal force</li> <li>Frictional force</li> <li>Electromagnetic force</li> </ol> </li> <li>Which of the following is NOT a type of motion?             <ol style="list-style-type: none"> <li>Constant velocity</li> <li>Constant acceleration</li> <li>Constant speed</li> <li>Constant direction</li> </ol> </li> <li>Which of the following is NOT a type of force?             <ol style="list-style-type: none"> <li>Gravitational force</li> <li>Normal force</li> <li>Frictional force</li> <li>Electromagnetic force</li> </ol> </li> <li>Which of the following is NOT a type of motion?             <ol style="list-style-type: none"> <li>Constant velocity</li> <li>Constant acceleration</li> <li>Constant speed</li> <li>Constant direction</li> </ol> </li> </ol> <div style="text-align: right;">  </div>
