Kahan, Dietram Scheufele, 2017 On topics from genetic engineering and mad cow disease to vaccination and climate change this Handbook draws on the insights of 57 leading science of science communication scholars who explore what social scientists know about how citizens come to understand and act on what is known by science

**Dual-use life science research and biosecurity in the 21st Century: Social, Technical, Policy, and Ethical Challenges** Jonathan E. Suk, Kathleen M. Vogel, Amanda Jane Ozin, 2015-06-04 In September 2011 scientists announced new experimental findings that would not only threaten the conduct and publication of influenza research but would have significant policy and intelligence implications The findings presented a modified variant of the H5N1 avian influenza virus hereafter referred to as the H5N1 virus that was transmissible via aerosol between ferrets These results suggested a worrisome possibility the existence of a new airborne and highly lethal H5N1 virus that could cause a deadly global pandemic In response a series of international discussions on the nature of dual use life science arose These discussions addressed the complex social technical political security and ethical issues related to dual use research This Research Topic will be devoted to contributions that explore this matrix of issues from a variety of case study and international perspectives

**The Routledge Handbook of the Political Economy of Science** David Tyfield, Rebecca Lave, Samuel Randalls, Charles Thorpe, 2017-04-28 The political economy of research and innovation R I is one of the central issues of the early twenty first century Science and innovation are increasingly tasked with driving and reshaping a troubled global economy while also tackling multiple overlapping global challenges such as climate change or food security global pandemics or energy security But responding to these demands is made more complicated because R I themselves are changing Today new global patterns of R I are transforming the very structures institutions and processes of science and innovation and with it their claims about desirable futures Our understanding of R I needs to change accordingly Responding to this new urgency and uncertainty this handbook presents a pioneering selection of the growing body of literature that has emerged in recent years at the

intersection of science and technology studies and political economy The central task for this research has been to expose important but consequential misconceptions about the political economy of R I and to build more insightful approaches This volume therefore explores the complex interrelations between R I both in general and in specific fields and political economies across a number of key dimensions from health to environment and universities to the military The Routledge Handbook of the Political Economy of Science offers a unique collection of texts across a range of issues in this burgeoning and important field from a global selection of top scholars The handbook is essential reading for students interested in the political economy of science technology and innovation It also presents succinct and insightful summaries of the state of the art for more advanced scholars

**Perspectives on Environmental Law Scholarship** Ole W. Pedersen, 2018-11-08 This collection invites environmental law scholars to reflect on what it means to be an environmental law scholar and to consider how and why environmental law scholars engage in environmental law scholarship Leading environmental law scholars from different backgrounds and jurisdictions offer their personal reflections on the nature form quality and challenges of environmental law scholarship The collection offers the first honest introspection on what environmental law scholarship is and is not It considers the unique contributions of environmental law scholarship to legal scholarship more generally reflecting on what sets environmental law scholarship apart from other disciplines of legal scholarship and the challenges arising from these differences

*Engineering Tools for Environmental Risk Management* Katalin Gruiz, Tamas Meggyes, Eva Fenyvesi, 2015-04-27 Chemical substances physical agents and built structures exhibit various types of hazard due to their inherent toxic mutagenic carcinogenic reprotoxic and sensitizing character or damaging to the immune and hormone system The first steps in managing an environment contaminated by chemical substances are characterization of hazards and quantifi
