Abbies God:

God's Babies John McKeown,2014-12-17 The human population s annual total consumption is not sustainable by one planet This unprecedented situation calls for a reform of religious cultures that promote a large ideal family size Many observers assume that Christianity is inevitably part of this problem because it promotes family values and statistically in America and elsewhere has a higher birthrate than nonreligious people This book explores diverse ideas about human reproduction in the church past and present It investigates an extreme fringe of U S Protestantism including the Quiverfull movement that use Old Testament fruitful verses to support natalist ideas explicitly promoting higher fecundity It also challenges the claim by some natalists that Martin Luther in the 16th century advocated similar ideas This book argues that natalism is inappropriate as a Christian application of Scripture especially since rich populations total footprints are detrimental to biodiversity and to human welfare It explores the ancient cultural context of the Bible verses quoted by natalists Challenging the assumption that religion normally promotes fecundity the book finds surprising exceptions among early Christians with a special focus on Saint Augustine since they advocated spiritual fecundity in preference to biological fecundity Finally the book uses a hermeneutic lens derived from Genesis 1 and prioritising the modern problem of biodiversity to provide ecological interpretations of the Bible s fruitful verses
