Abertions Scenarios And Prototypes:

Sexual Aberrations Wilhelm Stekel,1930 **Enlightenment Aberrations** David W. Bates,2018-09-05 In Enlightenment Aberrations David W Bates shows that error was a complex important and by no means entirely negative concept in Enlightenment thought one that had a decisive influence in revolutionary debates on political identity and national history What can it mean to write a history of error In Bates s view all philosophy insofar as its project is the search for truth begins in error If truth is posited as a goal to be attained not as a given of some kind then error assumes a central role in the quest for truth Going beyond both liberal celebrations and postmodern critiques of Enlightenment reason Bates reveals just how crucial the problematic relation between human wandering and the mystery of truth was in eighteenth century thought The author draws on a wide range of Enlightenment thinkers including Etienne Bonnot de Condillac Jean d Alembert Marie Jean Antoine Nicolas Caritat Marquis de Condorcet Jean Jacques Rousseau and Charles Bonnet showing how they wrestled with the risk and promise of error He then demonstrates how the concept of error and its dialectical relationship to truth played out in the political culture of the French Revolution particularly in the Terror In the final chapters Bates looks at the post revolutionary transformations of the Enlightenment discourse of error and its subsequent history in modern European thought

High Resolution Cathode Ray Tube Hilary Moss,E. Atti,L. F. White,G. L. Cox,1962 The general design and construction detail are presented of a 5 in diameter ultra high resolution CRT yielding a spot of 0005 in diameter at the half power points with a beam current of 5 microamperes It is shown that the performance achieved is almost certainly being

limited by aberrations in the final lens system and or by the screen grain structure There is reason to feel that a spot diameter of about 0.2 mil may be obtainable simply by substituting an evaporated phosphor and a larger final lens system It discusses the design of elaborate test equipment using the principle of slit scanning to measure these spot sizes accurately A general theory is developed of narrow angle cathode ray tube design which is applicable to any similar problem This theory is applied to study the limitations in cathode ray tube performance set by the maximum permissible cathode loading by the beam space charge by deflection defocussing and by constructional difficulties Author **Aberrations of Sexual Life, After the Psychopathia Sexualis** Richard Krafft-Ebing, 1959 **Adaptive Optics for Vision Science** Jason Porter, Hope Queener, Julianna Lin, Karen Thorn, Abdul A.
