About Teaching Mathematics Marilyn Burns, 1992-01 *About Teaching Mathematics, Fourth Edition* Marilyn S. Burns, 2022-05-27 *About Teaching Mathematics* is the most important resource in my teaching library. In the fourth edition of her signature resource Marilyn Burns presents her current thinking and insights and includes ideas from her most recent teaching experiences. Part 1 Starting Points reflects the major overhaul of this book and addresses twenty three issues important to thinking about teaching mathematics today. Part 2 Problem Solving Investigations opens with how to plan problem solving lessons followed by whole class small group and individual investigations organized into five areas of the curriculum: Measurement Data Geometry Patterns and Algebraic Thinking and Number and Operations. Part 3 Teaching Arithmetic focuses on the cornerstone of elementary mathematics curriculum offering ideas and assessments that build students understanding confidence and competence in arithmetic. Part 4 Questions Teachers Ask features Marilyn's responses to pedagogical questions she's received from teachers over the years. More than forty reproducibles are available for download in printable format to support your use of this resource. *What Expert Teachers Say about Teaching Mathematics, Grades K-8* Richard Dahlke, Roger F. Verhey, 1986 [About Teaching Mathematics](#) Marilyn Burns, 2000 *About Teaching Mathematics* quickly became a much sought after resource upon its publication in 1992. With more than 200 000 copies in print it presents information necessary for teachers to teach math through problem solving to understand the math they are responsible for teaching and to understand how children best learn math. Now Marilyn Burns has updated and expanded this important resource including an entirely new fifty page section Mathematical Discussion. Here she addresses many of the problems and activities in the text presenting the underlying mathematics for each as well as solutions. Another new section Extending Multiplication and Division addresses how to help students deal with large number computation. Burns has also made numerous changes to the section on fractions and has clarified and reorganized points throughout the book to make her ideas as clear and accessible as possible. *About Teaching Mathematics* now gives teachers an even better guide for making appropriate and effective instructional decisions. It is an essential resource for all teachers of K-8 mathematics.
