Above The National Average:

How the States Shaped the Nation Melanie Jean Springer, 2014-04-11 The United States routinely has one of the lowest voter turnout rates of any developed democracy in the world That rate is also among the most internally diverse since the federal structure allows state level variations in voting institutions that have had and continue to have sizable local effects But are expansive institutional efforts like mail in registration longer poll hours and no excuse absentee voting uniformly effective in improving voter turnout across states With *How the States Shaped the Nation* Melanie Jean Springer places contemporary reforms in historical context and systematically explores how state electoral institutions have been instrumental in shaping voting behavior throughout the twentieth century Although reformers often assume that more convenient voting procedures will produce equivalent effects wherever they are implemented Springer reveals that this is not the case In fact convenience voting methods have had almost no effect in the southern states where turnout rates are lowest In contrast the adverse effects associated with restrictive institutions like poll taxes and literacy tests have been persistent and dramatic Ultimately Springer argues no single institutional fix will uniformly resolve problems of low or unequal participation If we want to reliably increase national voter turnout rates we must explore how states voting histories differ and better understand the role of political and geographical context in shaping institutional effects

[An Introduction to Statistical Problem Solving in Geography](#) Arthur J. Lembo, Jr., J. Chapman McGrew, Jr., 2023-10-27 The fourth edition of *An Introduction to Statistical Problem Solving in Geography* continues its standing as the definitive introduction to statistics and quantitative analysis in geography Assuming no reader background in statistics the authors lay out the proper role of statistical analysis and methods in human and physical geography They delve into the calculation of descriptive summaries and graphics to explain geographic patterns and use inferential statistics parametric and nonparametric to test for differences t tests ANOVA relationships regression and correlation and spatial statistics point and area patterns spatial autocorrelation This edition introduces more advanced topics including logistic regression two factor ANOVA and spatial estimation inverse distance weighting Kriging Many chapters also include thought provoking discussions of statistical concepts as they relate to the COVID 19 pandemic Maintaining an exploratory and investigative approach throughout the authors provide readers with real world geographic issues and more than 50 map examples Concepts are explained clearly and narratively without oversimplification Each chapter concludes with a list of major goals and objectives An epilogue offers over 150 open ended geographic situations inviting students to apply their new statistical skills to solve problems currently affecting our world
