Psychoanalysis and the Global Ilan Kapoor, 2018-09-01 Psychoanalysis and the Global is about the hole at the heart of the global meaning the instability and indecipherability that lies at the hub of globalization. The contributors use psychoanalysis to expose the unconscious desires, excesses, and antagonisms that accompany the world of economic flows, cultural circulation, and sociopolitical change. Unlike the mainstream discourse of globalization, which most often assumes unencumbered movement across borders, these contributors uncover what Lacan calls the Real of the global, its rifts, gaps, exceptions, and contradictions. Psychoanalysis and the Global adopts a psychoanalytic lens to highlight the unconscious circuits of enjoyment, racism, and anxiety that trouble if not undermine globalization's economic, cultural, and environmental goals or gains. The contributors interrogate how unconscious desires and drives are externalized in our increasingly globalizing world, the ways in which traumas and emotional conflicts are integral to the disjunctions, homogeneities, and contingencies of global interactions, how social passions are manifested and materialized in political economy as much as in climate change, urban architecture, refugee and gender politics, or the growth of neo-populism, and how the unconscious serves as a basis for the rise and breakdown of popular movements against authoritarianism and neoliberal globalization. Psychoanalysis and the Global represents a major step forward in understanding globalization and also in extending the range and power of psychoanalytic critiques in and of geography.
