## **Dean And The Anarchist The:**

**The Dean and the Anarchist** James A. Preu, 1972      **Dean and the Anarchist** James A. Preu, 1959      The Dean and the Anarchist, By James A. Preu James A. Preu, 1959      *Contemporary Protest and the Legacy of Dissent* Stuart Price, Ruth Sanz Sabido, 2014-12-12 Contemporary protest often presented in media forms as a dramatic ritual played out in an iconic public space has provided a potent symbol of the widespread economic and social discontent that is a feature of European life under the rule of austerity Yet beneath this surface activity which provides the headlines and images familiar from mainstream news coverage lies a whole array of deeper structures modes of behavior and forms of human affiliation Contemporary Protest and the Legacy of Dissent offers a vibrant and insightful overview of modern protest movements ideologies and events Written by academics and activists familiar with the strategies values and arguments of those groups and individuals responsible for shaping the modern landscape of protest it reveals the inside story of a number of campaigns and events It analyzes the various manifestations of dissent on and offline visible and obscure progressive and reactionary through the work of a number of commentators and dedicated academic activists while reassessing the standard explanatory frameworks supplied by contemporary theorists In doing so it offers a coherent account of the range of academic and theoretical approaches to the study of protest and social movements Contributions by David Bates Mark Bergfeld Vincent Campbell Claire English Ingrid M Hoofd Soeren Keil Matthew Ogilvie Stuart Price Anandi Ramamurthy Ruth Sanz Sabido Lee Salter Cassian Sparkes Vian and Thomas Swann      **The Anarchist Roots of Geography** Simon Springer, 2016-08-01 The Anarchist Roots of Geography sets the stage for a radical politics of possibility and freedom through a discussion of the insurrectionary geographies that suffuse our daily experiences By embracing anarchist geographies as kaleidoscopic spatialities that allow for nonhierarchical connections between autonomous entities Simon Springer configures a new political imagination Experimentation in and through space is the story of humanity's place on the planet and the stasis and control that now supersede ongoing organizing experiments are an affront to our survival Singular ontological modes that favor one particular way of doing things disavow geography by failing to understand the spatial as a mutable assemblage intimately bound to temporality Even worse such stagnant ideas often align to the parochial interests of an elite minority and thereby threaten to be our collective undoing What is needed is the development of new relationships with our world and crucially with each other By infusing our geographies with anarchism we unleash a spirit of rebellion that foregoes a politics of waiting for change to come at the behest of elected leaders and instead engages new possibilities of mutual aid through direct action now We can no longer accept the decaying archaic geographies of hierarchy that chain us to statism capitalism gender domination racial oppression and imperialism We must reorient geographical thinking towards anarchist horizons of possibility Geography must become beautiful wherein the entirety of its embrace is aligned to emancipation      *The Dean and the Anarchist. (Jonathan Swift's Influence on William Godwin.)*. James A. Preu, 1959      Schools Into Fields and Factories

Ming K. Chan, Arif Dirlik, 1991 In this collaborative effort by two leading scholars of modern Chinese history Ming K Chan and Arif Dirlik investigate how the short lived National Labor University in Shanghai was both a reflection of the revolutionary concerns of its time and a catalyst for future radical experiments in education Under the slogan Turn schools into fields and factories fields and factories into schools the university attempted to bridge the gap between intellectual and manual labor which its founders saw as a central problem of capitalism and which remains a persistent theme in Chinese revolutionary thinking The authors bring to bear the perspectives of institutional and intellectual history on their examination of the structure and operation of the university presenting new material on its faculty curriculum physical plant and history They demonstrate how the prominent features and problems of Chinese higher education during the early years of the Guomindang regime prefigure the Marxist program of the Cultural Revolution and continue to have an influence on revolutionary thinking in the situation of China today Jacket

**Anarchism and eugenics** Richard Cleminson, 2019-05-22 At the heart of this book is what would appear to be a striking and fundamental paradox the espousal of a scientific doctrine that sought to eliminate dysgenics and champion the fit as a means of race survival by a political and social movement that ostensibly believed in the destruction of the state and the removal of all hierarchical relationships What explains this reception of eugenics by anarchism How was eugenics mobilised by anarchists as part of their struggle against capitalism and the state What were the consequences of this overlap for both anarchism and eugenics as transnational movements
