The Death Drive Rossella Valdré, 2024-09-02 This comprehensive yet accessible book analyses the clinical and historical experiences that led to the radical complex and fundamental psychoanalytic concept of the death drive In *The Death Drive A Contemporary Introduction* Rossella Valdré traces the path that led Sigmund Freud to theorise this key concept in his essay *Beyond the Pleasure Principle* She considers its roots in Freud's experiences of war trauma and his assessment of the human compulsion to repeat as well as its consequences on his later theoretical and clinical work Short vignettes from the clinician's room and examples from books and films introduce the reader to the birth and development of the concept its biological and philosophical roots and its many clinical implications Valdré also reviews its varied reception among post-Freudians and examines the controversies and questions that the death drive commonly engenders within the psychoanalytic community She concludes by considering the death drive through the medium of art its relationship with sublimation and the confirmation neuroscience is beginning to provide Written in a style that is at once accessible and precise this book is an invaluable tool to students and psychoanalysts in training approaching the theory for the first time as well as practising analysts postgraduate students and scholars familiar with the concept and looking to explore it further

Neuroscience and the Death Drive Adrian Perkel, 2025-07-24 In this book

Adrian Perkel seeks to expand upon Freud's theory of the death drive by locating it within modern neuroscience arguing for the centrality of the aggressive drive in the formation of mind and the genesis of symptoms and psychopathology. Neuroscience and the Death Drive reformulates the function of defence mechanisms as they link to the aggressive drive and their role in the binding of free energy. Filling an important gap in both formulation and treatment, this book completes Freud's self-confessed incomplete theory of aggression through the lens of modern psychoanalysis and neuroscience, updating these concepts with current scientific insights and introducing a refreshed view on psychotherapeutic treatment implications based on these developments. Perkel explores the treatment of patients experiencing eating disorders, anxiety, depression, addiction, personality disorders, and sexual dysfunction. This invigorating and approachable book will be of interest to all psychoanalysts, psychiatrists, psychotherapists, and counsellors and will help readers reach new understandings of this key theory of the mind.

The Uncanny Nicholas Royle, 2003. This study is of the uncanny, an important concept for contemporary thinking and debate across a range of disciplines and discourses including literature, film, architecture, cultural studies, philosophy, psychoanalysis, and queer theory. Much of this importance can be traced back to Freud's essay of 1919, 'The Uncanny' (Das Unheimliche). Where he was perhaps the first to foreground the distinctive nature of the uncanny as a feeling of something not simply weird or mysterious but more specifically as something strangely familiar. As a concept and a feeling, however, the uncanny has a complex history going back to at least the Enlightenment. Royle offers a detailed historical account of the emergence of the uncanny together with a series of close readings of different aspects of the topic. Following a major introductory historical and critical overview, there are chapters on the death drive, déjà vu, silence, solitude, and darkness, the fear of being buried alive, doubles, ghosts, cannibalism, telepathy, and madness, as well as more applied readings concerned, for example, with teaching, politics, film, and religion.

Psychoanalytic Reflections on The Freudian Death Drive Rossella Valdrè, 2018-12-07. Psychoanalytic Reflections on The Freudian Death Drive is a highly accessible book that investigates the relevance, complexity, and originality of a hugely controversial Freudian concept which the author argues continues to exert enormous influence on modernity and plays an often imperceptible role in the violence and so-called sad passions of contemporary society. With examples from cinema, literature, and the consulting room, the book's four chapters—Theory, The Clinic, Art, and Contemporaneity—investigate every angle usually little explored of the death drive: its positive functions such as its contribution to subjectification; its ambiguous relationship with sublimation; the clues it provides about transgenerational matters and its effects on the feminine. This is not a book about aggression, a type of extrojection of the death drive made visible, studied, and striking; rather, it is about the derivatives of the pulsion that changes in the clinic, in life, in society, in artistic forms. With bold and innovative concepts and

by making connections to film and books Rossella Valdr unequivocally argues that the contemporary clinic is a clinic of the death drive Psychoanalytic Reflections on The Freudian Death Drive seeks to relaunch the debate on a controversial and neglected concept and will appeal to psychoanalysts and psychoanalytic psychotherapists Today s renewed interest in the Freudian death drive attests to its extraordinary ability to explain both new pathologies and socio economic phenomena

Repetition, the Compulsion to Repeat, and the Death Drive M. Andrew Holowchak, Michael Lavin, 2017-11-30 Repetition the Compulsion to Repeat and the Death Drive is a critical examination of Freud s uses of repetition as they lead to the compulsion to repeat and his infamous death drive Like perhaps no other concept repetition drove Freud to an understanding of human behavior through development of models of the human mind and a method of treating neurotic behavior This book comprises three parts Part I Some Early Uses of Repetition in Psychoanalysis examines repetition both in clinical therapy and in Freud s use of phylogenetic explanation Part II composed of three chapters outlines Freud s journey to his vaunted death drive examines Beyond the Pleasure Principle and analyzes Freud s use of compulsion to repeat and the death drive post 1920 Last Part III is a critical analysis of Freud on repetition and the death drive discusses why Freud was so wedded to his controversial death drive and what can be salvaged from Freud s observations and speculations Here readers will find that Holowchak qua philosopher and Lavin qua clinician have different answers when it comes to the death drive The Psychoanalytic Review ,1928 **The Politics of Melancholic Reason** Bettina Prato,2006 **The Death Drive Revisited** ,2013 This dissertation is a reexamination of Sigmund Freud s mature drive theory also known as his theory of the death drive and its relevance for critical social theory and in particular that of the so called Frankfurt school By tracing the emergence of Freud s theory in his enigmatic Beyond the Pleasure Principle and then its development in the hands of Hans Loewald and Jacques Lacan I aim in the first three chapters to articulate a drive theory centered around the opposition between what Freud calls the death drive and the drive to mastery as well as the developmental hazards therein In the last two chapters I then attempt to integrate this drive theory into the Frankfurt school s analysis of the intrusion of mass media and state institutions on the developmental process with the aim of both providing historical weight to the dialectic of death and mastery articulated in the first part of the dissertation and also strengthening the psychological component of critical theory **New England Judged by the Spirit of the Lord** Joseph Grove,1885 Theosophical Outlook ,1919 **On the Destruction and Death Drives** Andre Green,2023-06-29 Living with the idea of bearing a death force fundamentally directed at oneself is hardly easy to admit It is less so in any case than the idea that we are all murderers that we are ever ready to plead legitimate defence or the need to survive so as to strike out at another Andre Green from the Foreword What drives men to kill and self destruct On the Death and Destruction Drives traces the introduction and development of the controversial concept of the death drive from the work of Freud 1920 1938 to the main contributions of classical and post Freudian authors including Ferenczi Klein Bion Winnicott and Lacan Shedding light on non neurotic phenomena and

structures such as anorexia bulimia depression suicide criminal behaviour Andre Green offers a new perspective on the relationship between the life drive Eros and the death drive Thanatos Andre Green was a key figure in contemporary psychoanalysis who embraced philosophy and an international outlook to enhance psychoanalytic theory This book was one of his last works originally published in French as *Pourquoi les pulsions de destruction ou de mort* in 2012 Green's defence of one of Freud's most daring revisions of his drive theory remains relevant to psychoanalytic work today and it is an honour to bring this excellent translation to the English speaking world To enhance its worth the book includes an introduction from translator Steven Jaron to clarify certain technical terms and situate the book within Green's oeuvre This book is an important contribution to the development of psychoanalytic theory and essential reading for all trainee and practising psychoanalysts

Sex, Machines and Navels Fred Botting,1999 This work offers a critical re-reading of fictions of humanity history technology and postmodern culture Taking psychoanalysis into cyberspace the book develops a theoretical perspective on the relationship with bodies and machines to offer a focused re-examination of the notions of desire metaphor sexed identity and difference and the process of technological transformation
