This is really three books in one a study in church history an essay in theology and a bibliographical source for scholars working in various disciplines and for librarians with catechisms of unsure provenance Ian Green has written the first major study of the catechisms and techniques of catechizing used in early modern England from the Reformation through to the Evangelical Revival He begins by demonstrating the existence of several hundred different catechisms with literally millions of copies circulating throughout the country in parish churches homes schools and colleges He then describes the techniques by which children adolescents and less well educated adults were encouraged to master a specially simplified version of the core doctrines contained in the best selling catechisms of the day Ian Green goes on to indicate the high level of consensus and continuity in catechetical teaching and suggests that such differences as there were consisted in either the disparity between the simpler message of many elementary works and the more demanding content of more sophisticated catechisms or in the less predictable contrast between on the one hand the teaching of non Calvinists and first generation Calvinists and on the other that of later Calvinists from Perkins to Westminster theologians Catechetical teaching especially on the Ten Commandments covered all aspects of contemporary life and the book ends with an annotated list of catechisms which enables those with an interest in educational literary or linguistic history or in political and social as well as religious history to track down quickly works that could be of particular value to them The Vade Mecum; Or A B C Guide to Denmark, Sweden, and Norway.
