The Wander Years Frederick Alfred Lort-Phillips,1931 *African Elephant Status Report 2002* J. J. Blanc,2003 The African elephant is the largest living land mammal and their potential impact on their habitats raises important management issues both for protected areas and unprotected land This Status Report derived from data contained in the African Elephant Database is rich in data and information on numbers distribution and current issues and provides continent wide information that is vital for conservation It will help wildlife management authorities to harmonize their policy and management decisions across regions as well as the continent to reduce conflict and relax the pressure on habitats *Glimpserama* Major Roxbrough,2017-07-25 *Glimpserama* is a glimpse into one of mankind s possible futures The first attempt is to begin colonizing the solar system and beyond Although technology may have advanced will man have learned the improved ways of living along with such progress Maybe not We see that though man has moved forward with technology he is still the same marred creature he ever was with very much the same old problems of morality and the simple ability to get along with his fellow man Here are fifteen stories of the human condition in the thirty third century

For Younger Readers ,1995

African Elephant Status Report 2007 J. J. Blanc,2007 **Snakes, People, and Spirits, Volume One** Robert

Hazel,2019-11-05 This two volume publication offers an in depth analysis of ophidian symbolism in Eastern Africa while setting the topic within its regional and historical context namely with regards to the rest of Africa ancient Egypt and Mesopotamia the Greek world ancient Palestine Arabia India and medieval and pre Christian Europe Through the ages most of those areas have connected with Eastern Africa in a broad sense where ophidian symbolism was as rampant and far reaching if not more so as anywhere else on the continent and perhaps in past civilisations Much as in the wider context snakes were held to be long lived closely related to holes caverns trees and water life and death and credited with a liking for milk Even though ophidian symbolism has always been developed out of the outstanding biological and ethological features of snakes the process of symbolisation which plays a crucial role in the elaboration of cultural systems and the shaping of human experience was inevitably at work This first volume deals with snakes as a zoological category snake symbolism as perceived by encyclopaedists and psychologists and ophidian symbolism as it occurred in ancient civilisations It explores the traditional African scene in general with a view to set the scene for a more proximate baseline for comparison The divide between animals and humans was porous and snakes had a more or less equal footing in both the animal realm and the spiritual world Key features of snake symbolism in traditional Eastern Africa are then examined in detail especially phantasmagorical snakes the rainbow serpent snake totems and snake related witches and ritual leaders among others In Eastern Africa the meanings attributed to snakes were multifaceted and paradoxical Overall the two volumes of this publication show that African snake symbolism broadly echoed the diverse representations of ancient civilisations The widely acknowledged assimilation of snakes to death and Evil is therefore unrepresentative both historically and culturally
