Able Children in Ordinary Schools Deborah Eyre,2013-07-04 First published in 1997 The purpose of this book is to help teachers of able children in ordinary schools Very little has been written in Britain about the education of able children although there is a wide body of research in other parts of the world What has been written has been primarily from the psychologist s viewpoint or has focused on individual or groups of able children Such research as has been carried out into provision has focused on selected groups of able children operating in optimum conditions Both of these elements provide useful information for the teacher but neither is in itself sufficient to enable ordinary schools to plan effective provision for their able pupils

*Educating the Able* Diane Montgomery,1996 The purpose of this book is to enable teachers to develop explicit criteria for identifying and helping able pupils After discussing the nature of ability and talent and identifying the able child Diane Montgomery examines curriculum provision paying particular attention to the National Curriculum and surveying different types of provision acceleration enrichment and differentiation She then describes methods of teaching for critical thinking The book ends with a chapter on helping the underfunctioning able child Throughout there are numerous examples and practical suggestions Teachers in primary and secondary schools as well as in higher education will find this book invaluable both as an introduction to the area and as a source of ideas
